Hi Ann!

Thought I would share this letter with you that I wrote to Hammond Water. Our last water bill was almost \$3,500 because of a leak. They are having us pay for half, which I still argued about. However, "it's not fair for the other water customers to pay for it," they said. I told them I knew it was a loss for their business, but it was a bigger loss for my family.

Any way, learn how to check your water meter, if you don't know already. They will not check more than every two months so it can really get away from you. Although if I see lots of water coming, you know I'll call. :)

Hope to see you soon!!

Robin
