Dear Sirs,

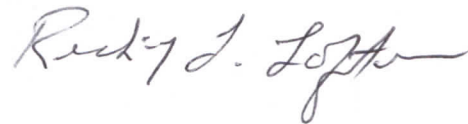

I would like to get a job with your company by bringing ideas that would enhance your productivity and earnings. Hemp for Mother Earth has been educating Citizens since 2005 and finally making Environmental Green headway. Your two companies could lead in Hemp Plastic and other car parts by investing in the sites mentioned in other letters which would supply the 13 car manufacturers in 600 mile radius of South Carolina. Yes! Commercial Hemp production should be passed in South Carolina this term and Mississippi within the next year. Ted Turner owns the most land in United States but lots of raped mining and forest land is available for a cheap price. These lands could rejuvenate the small farms which we need to supply our own food source once again. I'm trying to reduce power consumption by using hemp building products that leave no carbon footprint! The Medical field is wide open for Medical Marijuana which is way better than BIG PHARM drugs! It's really time for mankind to look after Mother Earth and I hope this letter gets your attention and you'll will help me achieve my goals in turning United States back into agriculture and manufacturing Country. The train will be a vital part of moving these products to manufacturing sites!!!

I have 13 Senators in South Carolina that has sponsored Hemp Farming Bill! The House is in favor of this Bill too! Don't have standing but do get in their faces and give the FACTS to consider and it's working. Please peruse these letter(s) and see I'm working for World Environmental Impact for all inhabitants of Earth. Your help would sure open a lot more doors and make this easier to get passed.

Yes! I want to make Haiti a Hemp Showplace in Western Hemisphere Too!!!

Thanks for your time.

Sincerely,

2013-2014 Bill 839: Industrial Hemp

scstatehouse.gov

Introduced in the Senate on January 14, 2014

Introduced in the House on March 18, 2014

Last Amended on March 6, 2014

Passed by the General Assembly on May 20, 2014

Governor's Action: June 2, 2014, Signed

Summary: Industrial Hemp

AN ACT TO AMEND THE CODE OF LAWS OF SOUTH CAROLINA, 1976, BY ADDING CHAPTER 55 TO TITLE 46 SO AS TO PROVIDE THAT IT IS LAWFUL TO GROW INDUSTRIAL HEMP IN THIS STATE, THAT INDUSTRIAL HEMP IS EXCLUDED FROM THE DEFINITION OF MARIJUANA, TO PROHIBIT THE GROWING OF INDUSTRIAL HEMP AND MARIJUANA ON THE SAME PROPERTY OR OTHERWISE GROWING MARIJUANA IN CLOSE PROXIMITY TO INDUSTRIAL HEMP TO DISGUISE THE MARIJUANA GROWTH, TO DEFINE CERTAIN TERMS, AND TO PROVIDE PENALTIES.

Be it enacted by the General Assembly of the State of South Carolina:

Findings

SECTION 1. The General Assembly finds that:

- (1) Hemp is a fiber and oilseed crop with a wide variety of uses, including twine, rope, paper, construction materials, carpeting, and clothing, and has the potential for use as a cellulosic ethanol biofuel.
- (2) Hemp seeds have been used in making industrial oils, cosmetics, medicines, and food.
- (3) Hemp and marijuana are genetically different cultivars of the same plant species and are scientifically distinguishable from each other.
- (4) Hemp is grown for scientific, economic, and environmental uses while marijuana is grown for narcotic use.
- (5) Research and development related to hemp has the potential to provide a cash crop for South Carolina's farmers with broad commercial application that will enhance the economic diversity and stability of our state's agricultural industry.

Industrial hemp cultivation

SECTION 2. Title 46 of the 1976 Code is amended by adding:

"CHAPTER 55
Industrial Hemp Cultivation

Section 46-55-10. For the purposes of this chapter:

(1) 'Industrial hemp products' means all products made from industrial hemp, including, but not limited to, cloth, cordage, fiber, food, fuel, paint, paper, particleboard, plastics, seed, seed meal and seed oil for consumption, and seed for cultivation if the seeds originate from industrial hemp varieties.

(2) 'Industrial hemp' means all parts and varieties of the plant *cannabis sativa*, cultivated or possessed by a licensed grower, whether growing or not, that contain of no more tetrahydrocannabinol concentration than adopted by federal law in the Controlled Substances Act, 21 U.S.C. 801, et seq.

(3) 'Tetrahydrocannabinol' means the natural or synthetic equivalents or substances contained in the plant, or in the resinous extractives of *cannabis*, or any synthetic substances, compounds, salts, or derivatives of the plant or chemicals and their isomers with similar chemical structure and pharmacological activity.

Section 46-55-20. It is lawful for an individual to cultivate, produce, or otherwise grow industrial hemp in this State to be used for any lawful purpose, including, but not limited to, the manufacture of industrial hemp products, and scientific, agricultural, or other research related to other lawful applications for industrial hemp.

Section 46-55-30. Industrial hemp is excluded from the definition of marijuana in Section 44-53-110.

Section 46-55-40. An individual who manufactures, distributes, dispenses, delivers, purchases, aids, abets, attempts, or conspires to manufacture, distribute, dispense, deliver, purchase, or possesses with the intent to manufacture, distribute, dispense, deliver, or purchase marijuana on property used for industrial hemp production, or in a manner intended to disguise the marijuana due to its proximity to industrial hemp, is guilty of a misdemeanor and, upon conviction, must be imprisoned not more than three years or fined not more than three thousand dollars, or both. The penalty provided for in this section may be imposed in addition to any other penalties provided by law."

Time effective

SECTION 3. This act takes effect upon approval by the Governor.

Ratified the 29th day of May, 2014.

Approved the 2nd day of June, 2014.

Will you give Hemp for Mother Earth and myself a chance to prove to you'll that we as citizens deserve the chance to grow and manufacture our own products here in United States. Yes! I still want Abigail Johnson, Warren Buffett, Bill Gates, Darla Moore and a few other's to help with this project to create jobs and healthy atmosphere with environmental products that reduce pollution and make poison free products. Where's your COMMON SENSE, INSIGHT & IMAGINATION TOO???????

Just pass the Hemp information along to the top Brass and let's put American's to work building cars grown and manufactured in United States. Thanks for the response though!

Subject: Fw: Using Hemp to Make Cars in America

I've written to Google Founders and Al Gore since 2007 explaining about the use of Hemp in making jobs for Citizens of United States. COMMON SENSE, INSIGHT & IMAGINATION TOO will put Citizens in America back to work with jobs grown and manufactured in America for World consumption. Please pass this along to President and other leaders of your Company because We as Citizens don't want you stealing our money like the Solar Panels misdeeds!

The 100 Million Dollar Hemp Plant that Mercedes Benz wants to build in South Africa to employ 4000 is sitting empty in America right now and can be had for \$26 Million with all the property!!!!!!!! Just an out of work 57 year young man that is primary care person for his 92 year young Mother with Alzheimer's.....If you are interested I can send you the sites for Ford Hemp Car and Popular Science

1937 article " Hemp Plastic 10 times stronger than steel." Popular Mechanics 1938
(Hemp first Billion Dollar Crop if We used today's technology) Just think in
Trillions today if we used COMMON SENSE, INSIGHT & IMAGINATION
TOO!

Would like a response!!!!!!!

Subject: Using Hemp to Make Cars in America

**I was surprise but not shocked to see the Powers that BE take bread out of
Citizens mouths by giving other Country money to build our electric cars. Yes!
Fisker and Tesla could be built right here with the technology that Henry Ford
used in 1930's to build and help run these cars that American Citizens are paying
for without the benefits of growing and manufacturing in the United States!
COMMON SENSE, INSIGHT & IMAGINATION TOO is not what you'll are
giving our economy to put America Citizens back to work.**

**Boeing's new plane is using composites in their plane instead of steel and
aluminum and we know that COMMERCIAL HEMP PRODUCTION would
produce plastic 10 times stronger than steel! All car bodies would be
biodegradable and turn to fertilizer instead of building eye-sores in the future.
NO! Let's ruin Mother Earth and not use the pollution eating Hemp plant to
help reduce ozone pollution. The Government Studies are there to be examined
by you'll but you don't have time to help future Generations have green
environmental jobs grown and manufactured in United States.**

4520 Monticello Rd. 9E Columbia, South Carolina 29203-4182

These choices are yours to make so do the right thing for our Nation. I really do need a job that
helps turn our Nation into a production factor in World Consumption once again!!!!

His Holliness, Pope Francis PP
00120 VIA DEL PELLLEGRINO
Citta del Vaticano

Dear Pope Francis,

I need your assistance in promoting God's Most Useful Plant on OUR Planet?
Commercial Hemp/Cannabis/Cannabinoids should be used instead of harmful chemical products; medical, agricultural and industrial.

God gave me a directive in 2005 while sitting in Bureau of Prisons in Jessup, Georgia to make Haiti a showplace in Western Hemisphere using Hemp. Hemp for Mother Earth has been trying to achieve this directive without success; Your help would move obstacles in my path!

The Mountains in Haiti could be covered in Hemp in 120 days. We could have three growing seasons each year without using any food producing lands. Hemp would provide: Plastic, Paper, Concrete, lumber, wallboard, charcoal, bio fuel, vitamins, food while making topsoil, fertilizer and stopping erosion. No more trees would be cut down.....Hemp uses less water to grow than other plants too.....

I have ideas for Hemp plastic portable housing that would work anywhere in the world. These houses could be built for under \$500.00. Hemp plastic is 10 times stronger than steel. The medical aspect is great for CURING AIDS, Diabetes, heart, lupus and many other diseases. God needs our help in returning EARTH to a Garden of Eden.

I have contacted every leader of Religious Denominations in South Carolina but NO ONE would answer nor pray with me on this directive.

God has sent you the remedy to food, housing and diseases in Hemp/Cannabis/Cannabinoids production to meet both of our needs to achieve our goals! Will you help this homeless, unemployed person?

May God Bless Mother Earth and ALL Inhabitants? Poisonous Products have to be removed. 100,000 Haitians could be working in production of all Hemp products produced in Haiti within one year.

Yes! We could clean up nuclear fallout and other pollution with this fast growing wonderful gift from God. Do you plan to let Corporations that are destroying mankind and earth continue to exist: Hearst, DuPont, Monsanto, Rockefeller and Dow??

I want to use the Federal Marijuana Act to CURE my diseases but can not get any response from Government. I do not want to be TREATED for the rest of my life by Big Pharm drugs that destroy the body.

Hope God moves your heart to help set Hemp/Cannabis/Cannabinoids free to heal our World. Peace & Happiness.

Sincerely,

Ricky Loftin

In 1976 President Gerald Ford put an end to all Cannabis Research
And Granted exclusive rights to Major Pharmaceuticals Companies!

In 1983 Reagan/Bush Administration told all Universities and Researchers to destroy
ALL 1966-76 Cannabis Research Work!

The problems with all medicines' the Doctor's prescribe for me are the diseases and death associated with their products. I don't won't to be treated for these disease at corporate profits for the rest of my life!

FEDERAL MARIJUANA...U.S. PATENT #6630507.....Department of Health and Human Services should give Citizens a chance to CURE their DISEASES??
Cancer was CURED.....Let's deprive DuPont of 125 Billion they make treating Cancer and cure it with God's most useful Plant.

Ricky Loftin

HEMP FOR MOTHER EARTH.....COMMON SENSE, INSIGHT, IMAGINATION, INGENUITY & INTEGRITY TOO!

HEMPFORMOTHEREARTH@YAHOO.COM (803) 716-7315

60 Minutes

Mr. Scott Pelley

Dear Mr. Pelley,

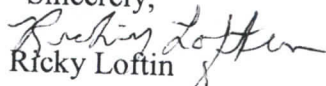

I would like to engage you and 60 Minutes in a challenge to see how far this homeless, ex-con/hippie can go with LEGAL HEMP in South Carolina.!

I started trying to make Haiti a SHOWPLACE IN WESTERN HEMISPHERE with HEMP in 2005. My Mother had Alzheimer's and I lived with her for 41 months and let her die with dignity at home in recliner. (93 years young). Free time was spent at library typing letter(s) to educate Citizens, Politicians and Preachers to God's most useful seed/plant gift to OUR PLANET. "HEMP" We got HEMP legal last year in S.C. but this is virgin territory that needs everyone's help to provide Billions to S.C. Citizens.

I can bring 2 Billion in Agriculture and manufacturing in hemp production to S.C. in 2016. Would you let me show you how this can be accomplished? I would like for Donald Trump (Apprentice) to do a segment on positive aspects of hemp production and products. I've sent Ellen Degenerate an e-mail asking for help but she did not respond. Ellen was giving away Mercedes Benz is using Hemp for a big portion of their vehicles now.

I've written Senator Obama/President Obama, George Bush, Ophra and Warren Buffet since 2006 without getting any response when HEMP was not legal! IF? YOU OR OTHER'S WILL HELP; I'LL CHANGE THE POISONS AND CHEMICALS IN PRODUCTS IN U.S. AND MAKE THEM BIODEGRADABLE.

"Your dignity can be mocked, abused, compromised, toyed with, lowered and even badmouthed, but it can never be taken from you. You have the power today to reset your boundaries, restore your image, start fresh with renewed values and rebuild what has happened to you in the past."

Sincerely,

Ricky Loftin

Mr. Akio Toyoda

& Mr. Masafumi Hamaguchi

President Blue Springs Toyota

1200 Magnolia Way

New Albany, Mississippi 38652

Dear Sirs:

I would like for you to examine my ideas for rebuilding Japan; Ground, Air, Water and earthquake resistant building products. Yes! My 92 year young Mother passed on January 15, 2012 and I want to do something special to change the pollution of Mother Earth. I resided and cared for Mother (only child) for four years while heart and Alzheimer diseases ravished her body. I ask one thing of the Almighty, "Mother would leave this earth with dignity and that was answered".

I'm 57 years young and know COMMERCIAL HEMP PRODUCTION will make better products with less pollution; while creating jobs and trillions of dollars in new product (existing products made with less pollution) cheaper for World consumption. I want to take the lies and deceit off this plant and open up all markets with environmentally GREEN PRODUCTS!

HEMP: The Most Useful Plant on our Planet. I'm sending you some letter(s) to peruse that show where the Billions are being made now with imported Hemp that would turn into Trillions with the right backers!

Would you consider giving me a job driving cars off assembly line in Blue Springs, Mississippi Plant? I'm moving February 1, 2012 and don't have a job but have a place to stay in Tupelo, Mississippi. I figure I'll have 15 good healthy years of work in my body and love to drive. This request is unusual but gets me a start to pursue my passion: Hemp for Mother Earth. I really do need a job?

We can change the lies and deceit of Hearst and DuPont Dirty Washington Politicians that change the most productive plant on our planet into marijuana to protect their Billions in 1937! These same Politicians were used against Orson Wells's movie, "Citizen Kane"....article enclosed.....

**Thank you for your time and consideration on my request. My ideas have merit for the benefit of the World. Hope to hear from you soon. I will be leaving 4520 Monticello Rd. 9E, Columbia, S.C. 29203 because it's 62 and older Elderly Community. Mother was there for 28 years and enjoyed the social setting and activities.ricky.loftin@yahoo.com
hempformotherearth@yahoo.com The last four years with Mother was a blessing and I need to move on with life and try to help Mother Earth! Will you help me?**

Sincerely Yours,

Ricky Len Loftin

Governor Haley, Hope you will research the Canadian Hemp enterprise in Canada on you tour of Country. Canada ships 1 Billion in Hemp to U.S. each year. We could finally have the defunct Power Generator at University of South Carolina going with Hemp burning instead of woodchips.....I hope you contacted Harris Pastides to get N.F.L. #300,000.00 Grants to study Medical Marijuana on football injuries! A citizen that gets no answers from Political leaders on subjects that would create Billions of homegrown and manufactured products....hempformotherearth@yahoo.com Ricky Loftin (803) 771-4308

Wish you would bring this to attention of meetings with Commerce Department.....I've tried since 2005 on this matter.....Even tried to Bring Mercedes Benz wish to build 100 Million Dollar Plastic, cloth, cardboard and carpet factory to South Carolina/Mississippi....13 Car manufactures in 600 mile radius... Governor! Why are you not trying to lead South Carolina Citizens to better Environmental Jobs....????

February 18, 2014 Bill eyes hemp production in Indiana Manufacturers paying for imported product want to purchase here at home. By Maureen Hayden CNHI Statehouse Bureau Pharos-Tribune Pharos-Tribune Tue Feb 18, 2014, 02:50 AM EST INDIANAPOLIS – Gregg Baumbaugh has 4,000 pounds of cannabis sitting in his automobile parts manufacturing plant. It wasn't illegal for him to import it, but it's against the law for Indiana farmers to grow the variety of cannabis he buys in bulk. Baumbaugh wants to see that changed. The "weed" he uses to make the insides of interior doors and armrests at his Elkhart County facility doesn't have enough of the psychoactive ingredient THC to give anyone a marijuana mind-altering high. "If somebody smokes the stuff we import, the only thing they're going to get is a nasty headache," said Baumbaugh, CEO of FlexForm Technologies and an advocate for the legalization of industrial hemp. Last month, Baumbaugh testified in favor of legislation that could open the door in Indiana to the farming and production of pot's less potent cousin: hemp, a multipurpose crop that can be used in the production of textiles, foods, plastics, building materials and medicines. To the surprise of the bill's co-sponsor, Sen. Carlin Yoder, R-

Middlebury, the legislation passed out of the conservative, Republican-controlled Senate with unanimous support and is headed for the House. Similar legislation in past years, entangled with efforts to legalize marijuana, never got out of committee. "Nobody was expecting it was going to be a unanimous vote," said Yoder, who admitted he was a reluctant supporter of the bill until Baumbaugh — whose plant is in Yoder's district — enlightened him. Baumbaugh spends almost \$1 million a year importing hemp and other natural fibers that provide the lightweight, biodegradable material that his automobile manufacturing customers, including Mercedes-Benz

and Volkswagen, want used in their car interiors. The low weight of the material helps increase the car's fuel efficiency. "I could save a lot of money if I could buy it locally from farmers who were allowed to grow it,"

Baumbaugh said. "It's easy to grow. That's why they call it a 'weed' — you can grow it anywhere." Yoder concurred: "The more research I do, the more ridiculous it seems that we're not growing hemp." Marijuana and hemp are different varieties of the same species of plant — *Cannabis Sativa* — which is why it's not a legal cash crop in Indiana. It used to be: The state's farmers produced industrial hemp rope during World War II when the federal government encouraged farmers to grow hemp as part of the war effort. But the Controlled Substances Act of 1970 lumped industrial hemp with marijuana and outlawed production of both, despite their chemical differences. According to the national Hemp Industries

Association, a pro-hemp trade group, manufacturers like Baumbaugh are allowed to import industrial hemp from countries that certify their product has a low level of THC — less than three-tenths of one percent. That's a small fraction of the THC content of marijuana, which runs 14 percent to 30 percent. Senate Bill 357, which Yoder co-sponsored with Sen. Richard Young, D-Milltown, is a first step toward pulling marijuana and hemp apart. It would clear the way for universities to conduct research to identify seeds to be certified by the state to grow hemp — a critical step in culling the similar-looking marijuana and hemp plants apart. The bill would also put the Indiana State Chemist and Seed Commissioner at Purdue University in charge of overseeing hemp production, in cooperation with the Indiana State Police. It also creates a licensing procedure for Indiana farmers interested in growing hemp. None of it has meaning, though, unless the federal

government clears the way. That could happen soon too: The new federal Farm Bill, signed by President Obama earlier this month, allows state agriculture departments and universities to grow hemp for agricultural

research purposes. But it applies only to the 10 states that have legalized industrial hemp farming, as the Indiana legislation is attempting to do. Lauren Stansbury of the Hemp Industries Association, said the new federal farm bill provides a needed first step toward encouraging states to engage in industrial hemp production. "So often, hemp gets caught up in the politics of marijuana," she said. "But we're seeing more states recognize the agricultural value of hemp." Yoder says it helps to have farmers and manufacturers behind the bill. Retired Indiana Farm Bureau lobbyist Bob Kraft testified for the bill when it was in the Senate, lending the legislation more credence. Baumbaugh was glad to see him there. "I was afraid it was just going to me and a bunch of potheads," he said. "I thought if that happens, we won't have a snowball's chance in hell of seeing this thing get passed." The legislation is now in the House. Maureen Hayden covers the Statehouse for the CNHI newspapers in Indiana. She can be reached at maureen.hayden@indianamedia group.com. Follow her on Twitter @MaureenHayden

I really need a job and Mayor Benjamin/Ms. Wilson won't let me work for City of Columbia!!!!!!
