Hi Everyone,

I just wanted to send out a couple of reminders, etc.

I would like to remind all of you the importance of using quotes from interviews of employees or customers of the Board in putting forth your recommendations. You may also use the surveys for anonymous quotes and let me know if they need to know how to get back in the system.

Please give me the approximate number of hours that you estimate you will have spent on this project by the time its completed as well as the number of interviews (phone interviews count too) that you have done so that we can compile the information for the introduction of the report. This will include discussions with board employees, customers and outsiders that you have tapped for information.

Please make sure that you don't double-count if two of you interviewed the same person and tell them that if Chad was in an interview with any of you then he will not be including it on his list. Please email that back to me (and Chad won't see it so you don't need to feel the need to fudge your time!) so I can compile it.

Also, please don't forget to respond to the below email if you haven't already. I need to get all of the availability ASAP.

Thanks everyone for all of your hard work.
