Sammy let me know when you get this.

QUOTE FROM CHANEY ADAMS, HALEY PRESS SECRETARY, "This is obviously a good thing for South Carolina, but only if the Feds follow through on the report and actually move the waste from Savannah River. The DOE does not have a great track record of keeping its promises to the people of South Carolina, which is why we will continue to push them in every way we can to make sure our state is not a dumping ground for others' nuclear waste."

Chaney,

I have several more plutonium questions. It relates to a section of my story today about six metric tons of plutonium proposed to be sent from SRS to New Mexico.

I received a copy of a federal notice this morning that provides more details. As I understand, it will be formally posted in the federal register as soon as tomorrow.

I'll paste the link below.

Questions

- A) Is the governor aware of this plan?
- B) Does she think this is a good proposal to ship 6 metric tons of plutonium from SRS to the Waste Isolation Project Plant in New Mexico?
- C) How would this help resolve issues with plutonium at SRS?
