

HABS/HAER INVENTORY

Building Number: 25

Structure Name: Building 25, Boat House

Location: United States Marine Corps Recruit Depot at Parris Island, SC

Construction Date: 1942

Use Original/Present: Boat House & Marina Office

Rating: 2

Condition: Good, no apparent alterations

Description:

This is a 577 square foot, single story structure, L-shaped in plan, built on a poured concrete slab. The exterior walls are of brick laid in a common bond, and the low-pitched roof is composed of intersecting hips and covered with asbestos shingles. There is a cylindrical cent pipe located at the rear of the roof. At the front of the building is a single flush wood door, and at the side of the building is a set of double flush wood garage doors and a single flush wood pedestrian door. The windows are six-over-six wood double hung windows, covered with steel mesh panels. At the rear of the building, the wall which forms the end of the projecting leg of the L, has a lattice-like brickwork pattern on the upper half of the wall. At the front of the building is a hopper-style metal vent projecting out of the wall.

History:

Building 25 was constructed in 1942 as a boat house. It was built as part of the massive mobilization efforts that ensued upon the outbreak of World War II in 1939. This expansion, which continued throughout the war period, was launched in order to better accommodate the increased numbers in personnel. This required the construction of adequate facilities for the 240,509 recruits who would pass through the installation during the war. The construction of numerous prefabricated buildings, the expansion of Page Field, and the addition of women's facilities were among the major developments effected at Parris Island during World War II.

This building is located in the World War II Subdistrict of the Mainside District, which is the main administrative and training area at Parris Island. The buildings in the subdistrict are associated with increasing activity at Parris Island shortly before and during the participation of the United States in World War II.

Significance:

This building is a contributing element of the World War II Subdistrict of the Mainside District at Parris Island. The building is significant in that it retains integrity of location, design, setting, materials, workmanship, and feeling; and for its association with event that have made a significant contribution to the broad patterns of our history (WWII).
