Subject: RE: Facts and Figures!

Got it. Good info but not very exciting. Are there any charts readably available that we could have made up?

Thanks.

We'll get a somewhat modified version of this tomorrow, but this is what the department has been using.

I've attached our one pager that we provided to legislative staff and the coalition to use - it sums up all of the stats in our Getting to Good presentation. The Secretary asked me to make a few changes but it doesn't include some of the information you've asked for below. I'll re-tool it tomorrow and send to you. And by the way...we've changed our message to say "maximizing preservation" versus "managing the decline" and "reshaping the system" versus "reducing the system."

Talk tomorrow.
