Subject: FW: Diamondback terrapin might be key to march health - Greenville  
News 04/10/2016

Governor Haley – Further to my e-mails of 2 weeks ago concerning the misguided proposed development of 50 homes on Capt. Sams Spit, yet one more reason to derail this obnoxious venture is the loss of another nesting area for the diamondback terrapin, the only estuarine turtle in North America, whose numbers have been declining for many years as its habitat is continually lost.

Please take whatever measures are necessary to rid South Carolina of the potentially disastrous Capt. Sams Spit development project. Thank you for your service to our state.

Doug Young
