Baker Creek state park is absolutely disgusting what they have done to that park. If that's called a remodel the. I suggest firing the crews that made all that mess. Many people I know have rode thru there including myself and would never camp in such a mess.

Thanks for your message. We are still in the process of cleaning all the trees and stumps the Army Corp of Engineers loggers left behind. We focused our efforts on getting the sites safe for our guests, so we could open while continuing to clean up and beautify the campground. It will take a little time for the grass to grow and the campground to flourish with native plants. It's a work in progress. Thanks for your patience.
