

May 30, 2016

Attn: President Obama
US Congress
US Supreme Court

Copy to: state governments of the 50 federal states of USA

Where are you now, America as a collective being?

What the hell is going on in the world? Why are there so many conflicts, violence?

Why has our climate changed drastically, are many more disasters coming?

Why are there so many falsehood cases being revealed?

Why can't we easily reach an agreement, but get through fierce fights in the government?

....

We see police brutality towards civilians on streets in handling social issues to induce more tension and social injustice;

We see traffic police, traffic enforcement ambush drivers, treating them as criminals, pushing them to the edge, always under the name of 'violation of laws', or under the purpose of avoiding traffic accidents and death while unconsciously increase social unease;

We see the civil courts almost every day filled with frustrated people, treated like machines, we were sent to experience the prolonged legal procedures, and to know that justice is not a guaranteed outcome upheld by the court although they may think so, and there is no coordination between government institutions in handling civil issues, resolving social problems; in fact people are always guided and pushed to resort to legal procedures or lawyers for issues which can be resolved at local community level or between themselves to avoid the escalation to social problems, and which we see as one of the main sources for wrongdoings and immoral deeds indulged among people

While the life of the majority of people in the population are being squeezed, businesses seem always get preference and green lights over individuals which is reflected in current tax systems and some business regulations, and which is absurd for a society that upholds human rights as one of its founding principles

While small and medium sized operations get harder and harder in doing 'business' which allure some weak-willed minds to resort to immoral deeds, more and more profits accumulate in the hands of corporate business handlers;

Millions of people struggle to pay their bills and fulfill their educations, live under poverty lines, while many in the highest earning brackets successfully evade from their social responsibility of taxes, legally and illegally...

America, have you forgotten where you came from? Why did you break from the British Colony for your Freedom? Wasn't it because the ruling class deprived of your equal rights to live a decent life, wasn't it because the Laws of Nature, the equality and freedom, two of the creation principles have been trampled in that old system?!

Well well well...

If these are your concerns, you are on the right path

The world is undergoing an unprecedented historic change profoundly, and America is right at the center of it. The problems, conflicts you are encountering, experiencing are the reflections of the current clashes between the new uplifting energy for a Spiritual True Life and Freedom and the old destructive heel-gripping energy of controlling, manipulating for material hoarding for the modern form of slavery whose master is money.

I am the swords bearer, coming from the Inner World, God has given me the authority and permission to facilitate the transformation of the earth life from a force-engined near broken system to a self-sustained Spring Field.

Now the whole world is awakening, America is not exceptional - the masses are ready and taking the lead for the transform from the old systems to accommodate the emergence of the new Green Earth Life. What the difference the current movement compared with any of those in history is that this time it requires and involves any earth citizen to consciously participate and do your parts, which means we would/should not fight against each other but facing the same direction - the ascension path. It is an evolution in the whole planetary sphere, but may feel revolutionary change to some at regional and subspheres in human society, thus it may cause a lot of unease, however this is a healthy unease - it is the pain before a child delivery and the moan of the phoenix before its rebirth.

To consciously prepare yourself in participating in this humanity evolution at your current governing posts, you would need to recognize the emerging new world and redefine a lot some of you may have held as your bible for the whole of your life and be prepared for being knocked over. Many of you have already walked ahead on this journey. And God wants each of you read the recently published book 'Stop Stop Stop undust the common sense of Timeless Wisdom – transformational initiatives to the Green Earth Life'. Some world leaders, president Obama and some congressmen have read it. It's on Amazon stores.

*'Dan shall judge his people as one of the tribes of Israel.
Dan shall be a snake by the roadside, a viper along the path,
that bites the horse's heels so that its rider falls backwards.'*

This would relate to the whole existing legal systems not just in US, but the whole world.

Any civil servant in governments regardless posts high or low, with the uniform, name badge on, you are a 'worker' for the government, while behind this inanimate wrapping at the core you are a human being, and how do you treat your fellow human beings is a reflection on how you look at yourself, how you value yourself.

Jesus said, *"A grapevine has been planted outside of the Father, but being unsound, it will be pulled up by its roots and destroyed."*

The revelations to us tell the grape wine refers to the whole mosaic law which was built on complicated trivial forms for mind control, provoking the feeling of fear and guilt, spreading hatred, killing, divisiveness and negativity. The era of strife marked by demonizing others to provoke fights and competitions therefore selfishly depleting the natural environment is ending, and ushers in the new era of universal goodness, universal brotherhood characterized with cooperation and coordination which requires human beings recognize the reality that the whole earth is one inseparable community and all beings in this community has an equal right to enjoy God's creation. Therefore the four principles of the Heavenly Law, of God's Creation must be upheld by new earth citizens in their daily deeds. Whoever embraces the new era with an open heart and mind will not be left behind, and whoever tries to hold back and act against the nature's trend can only encounter more chaos, troubles and eventually be cast under the wheel of space time.

At this historic moment, the US government, both the federal government and the local state governments, has a very important role to fulfill – that is to overhaul the whole legal system, financial system, and all other social operational systems to let go all those rules and regulations that hold back the social advancement and update them to accommodate the new emerging Green Earth Life and quickly adjust your policies towards a green sustainable 'economy'. By doing so you may be able to set an example and to show case in the world that we human beings with the Spirit in us have the ability to self-reflect and have the conscious to evolve to much enlightened beings.

You may want to meditate on the new concepts of greatness, leadership and wealth with a conscious understanding showered with the green life-bearing energy.

And embedded in the design of the US National Flag and the bald Eagle in the National Emblem, there is a conscious meaning in it for the highest state of human development which under the Providence was sealed to the founding fathers and now it can be revealed to those who are ready!

Perhaps your president may know it and he may share it with you, why not ask him?
