Subject: Governor Haley will you pay attention to me now??????? Gerrie and Jamal refuse to return phone calls!!!

Working to bring Environmental Green Industrial Revolution for Citizens of South Carolina to have jobs and small businesses grown from our soil.....13 car manufacturers in 600 mille radius of S.C. that needs hemp plastic, carpet, cloth and cardboard for automobiles.....Doing away with pollution dirty Fiberglass,,,,,,,,,,,,,,Hemp for Mother Earth working for the Citizens of S.C. since 2005.....COMMON SENSE, INSIGHT, IMAGINATION, INGENUITY & INTEGRITY TOO!!!

Governor Haley,  
Opposes our growing our way to future; We need to be a Service Industry STATE..... I have been asking Governor Haley since she was entering Governor's Office to please help HEMP FOR MOTHER EARTH secure the Hemp Plastic for the 100 Million dollar plant Mercedez Benz wanted to build in 1998? Mercedez Benz is 35% hemp plastic, carpet, cloth and cardboard and going to be like henryfordhempcar1941.com WHY CAN WE AS CITIZENS NOT GROW THIS ENVIRONMENTAL GREEN INDUSTRIAL REVOLUTION WITH OUR OWN CITIZENS. Hemp for Mother Earth....COMMON SENSE, INSIGHT, IMAGINATION, INGENUITY & INTEGRITY TOO!! Our Citizens needs first and then OUTSIDE CORPORATIONS!!!  
Levi Straus is going to use Hemp Fabric in jeans for the first time in 40 years and looking for production sites.....Morgan Stanley and R.J. Reynolds took hemp manufacturing to China in 2010 so are the Chinese investing 240 Million in Spartanburg County in sewing rooms going to secure Levi contracts?????????

Driving pleasure  
Hemp is used in over 25,000 products, now including BMWs

Hemp fibers are probably something you associate more with ropes, sacks and baggy ethnic clothing than with luxury cars. But in a report on BMW's new electric car, the i3, Bloomberg notes in passing that the car maker will line the door panels with hemp, as part of an interior design apparently aimed at making the i3's drivers feel closer to nature and less likely to drain the battery in a speed-freak fit.

Companies have been using the organic raw material, which is made from the marijuana plant (usually with the cannabinoids stripped out), for decades. The Hemp Research Association estimates that the retail value in the US of hemp products came to \$500m in 2012, even though the US remains the only industrialized country in which it's illegal, except in two states, to grow even the drug-free form of hemp.

And while it hasn't lost its hippie associations, hemp has been taken up by a number of fashion brands. Giorgio Armani started using hemp in an Emporio Armani collection in 1995, while Ralph Lauren makes hemp floor rugs. In 2010, Burberry designed a suit for actor Woody Harrelson out of hemp, and a Canadian company, CRAiLAR, tried to commercialize a process for developing softer materials from hemp fibers. (It ultimately decided to shift its attention to flax, due partly to the US's hemp-growing ban.)

But it's not just fashion designers who have been using hemp. At the end of last month the US

Congressional Research Service published a paper by Renée Johnson, an agricultural policy specialist, entitled Hemp as an Agricultural Commodity (pdf), which says:  
Some estimate that the global market for hemp consists of more than 25,000 products in nine submarkets: agriculture; textiles; recycling; automotive; furniture; food/nutrition/beverages; paper; construction materials; and personal care. For construction materials, such as hempcrete (a mixture of hemp hurds and lime products), hemp is used as a lightweight insulating material. Hemp has been used in cars for some time, and not just for the door panels. Students at the University of Warwick even developed a race car in 2007 whose outer shell was made from hemp. James Meredith and his team believe that hemp can replace carbon fiber as a lightweight material for a car body. Perhaps BMW can think about that for its next electric car.

HEMP for Mother EARTH

“The voyage of discovery is not in seeking new landscapes but in having new eyes.”

— Marcel Proust

HEMP FOR MOTHER EARTH....COMMON SENSE, INSIGHT, IMAGINATION, INGENUITY & INTEGRITY TOO!!!!
