---

Frank,

I know you might not have the '11 tax data yet, but do you mind rerunning this with whatever your best/latest guesstimate would be? I imagine the figure won't move that much regardless. Thanks.

Hi Christian,

Attached is the estimated impact on FY 13 (current year) for eliminating the 6% individual income tax bracket. When we received the data for the 2011 tax year, we can update the estimate for FY 14 if you like. Please let us know if you have any questions.

Frank

Lisa,

Please estimate the impact for "FY 13" (use the same data as with the previous examples) by eliminating reducing the 6% tax bracket to 5%. The brackets will be 3, 4, 5 and 7 percent, the new 5 percent bracket will the old 5 & 6 brackets. Let me know if you have any questions.

Thanks

Frank
