RE: Kathy Jo Cole
DOB: 10/17/59

To Whom It May Concern:

Ms. Cole is a 47-year-old, white female who was found to have a very large left breast mass and underwent a mastectomy under the care of Dr. Sisco. This was followed by two cycles of Taxotere-Cytoxan. Originally, she was planned to take four cycles, but she could not tolerate it from the standpoint of her side effects. She was significantly impaired and continues to recover from the chemotherapy. She will now take the Arimidex, as part of a continued adjuvant strategy, for the next five years. She will also maintain regular follow-up with both her medical oncologist and surgical oncologist through the 2012 time period.

Sincerely,

W.M. Newberry, M.D.

WMN/law
