His Holliness, Pope Francis PP  
00120 VIA DEL Pellegrino  
Citta del Vaticano

Dear Pope Francis,

I need your assistance in promoting God's Most Useful Plant on OUR Planet? Commercial Hemp/Cannabis/Cannabinoids should be used instead of harmful chemical products; medical, agricultural and industrial.

God gave me a directive in 2005 while sitting in Bureau of Prisons in Jessup, Georgia to make Haiti a showplace in Western Hemisphere using Hemp. Hemp for Mother Earth has been trying to achieve this directive without success; Your help would move obstacles in my path!

The Mountains in Haiti could be covered in Hemp in 120 days. We could have three growing seasons each year without using any food producing lands. Hemp would provide: Plastic, Paper, Concrete, lumber, wallboard, charcoal, bio fuel, vitamins, food while making topsoil, fertilizer and stopping erosion. No more trees would be cut down.....Hemp uses less water to grow than other plants too.....

I have ideas for Hemp plastic portable housing that would work anywhere in the world. These houses could be built for under \$500.00. Hemp plastic is 10 times stronger than steel. The medical aspect is great for CURING AIDS, Diabetes, heart, lupus and many other diseases. God needs our help in returning EARTH to a Garden of Eden.

I have contacted every leader of Religious Denominations in South Carolina but NO ONE would answer nor pray with me on this directive.

God has sent you the remedy to food, housing and diseases in Hemp/Cannabis/Cannabinoids production to meet both of our needs to achieve our goals! Will you help this homeless, unemployed person?

May God Bless Mother Earth and ALL Inhabitants? Poisonous Products have to be removed. 100,000 Haitians could be working in production of all Hemp products produced in Haiti within one year.

Yes! We could clean up nuclear fallout and other pollution with this fast growing wonderful gift from God. Do you plan to let Corporations that are destroying mankind and earth continue to exist: Hearst, DuPont, Monsanto, Rockefeller and Dow??

I want to use the Federal Marijuana Act to CURE my diseases but can not get response from Government. I do not want to be TREATED for the rest of my life by Big Pharm drugs that destroy the body.

Hope God moves your heart to help set Hemp/Cannabis/Cannabinoids free to heal our World. Peace & Happiness!

Sincerely,  
  
Ricky L. Loftin

**In 1976 President Gerald Ford put an end to all Cannabis Research And Granted exclusive rights to Major Pharmaceuticals Companies!**

**In 1983 Reagan/Bush Administration told all Universities and Researchers to destroy**

**ALL 1966-76 Cannabis Research Work!**

The problems with all medicines' the Doctor's prescribe for me are the diseases and death associated with their products. I do not won't to be treated for these diseases at corporate profits for the rest of my life!

FEDERAL MARIJUANA...U.S. PATENT #6630507.....Department of Health and Human Services should give Citizens a chance to CURE their DISEASES??

Cancer was CURED.....Let's deprive DuPont of 125 Billion they make treating Cancer and cure it with God's most useful Plant.

Dear Mr. Pastides,

[ricky.loftin@yahoo.com](mailto:ricky.loftin@yahoo.com) [hemppformotherearth@yahoo.com](mailto:hemppformotherearth@yahoo.com)

I would like to get your assistance getting cannabis for different diseases studied at South Carolina. This Study would include smoking and eating cannabis to control pain. Hemp Oil would be used to cure Cancer, Alzheimer's, epilepsy, blood disorders and stomach problems! Britain, Spain and Israel are far advanced with released to public on cannabis studies; with positive results. We really need to catch up with their success in South Carolina so I want to be one of the first in this study!

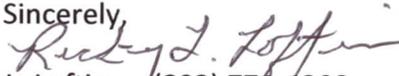

I do have the required deficient diseases to participate this endeavor. Ole Miss has been doing cannabis research since 1974 so getting Federal Funding should be a breeze. Ole Miss CURED Cancer and been hiding studies since 1974!!! The relief for pain in my body would be wonderful!!!!

HEMP FOR MOTHER EARTH is still trying to get all Politicians in South Carolina to join together and get a Commercial Hemp Bill; for the Trillions in new dollars benefiting each Citizen. DON'T LET CITIZENS OF South Carolina CONTINUE TO SUCK-HIND-TIT-ON-A-BOAR-HOG! Most of the plastic in CARS will be hemp in the coming years. Mercedes Benz is 35% hemp since 2012: hemp cloth seats, headliner and body of car.....Politicians need COMMON SENSE, INSIGHT, IMAGINATION & INGENUITY to pilot a victory for Citizens of South Carolina using Commercial Hemp Production! Hemp will be the next BULL MARKET on WALL STREET .

A few things that would be effective for commerce in the State of South Carolina: HEMP: Medical/Agricultural/Manufacturing. This is all home grown and manufactured in South Carolina while reducing Green House Gases. Commercial Hemp Production would render a surplus of money for schools, roads, ports, medical and new innervation!

Please contact me when we can start a program of study. I'm in pain and need relief!

Sincerely,

Ricky L. Loftin ~~(803) 774-4308~~

(803) 716-7315

## COMMERCIAL HEMP PRODUCTION FOR CITIZENS OF SOUTH CAROLINA'S FUTURE JOBS AND COMMERCE

### It's fun to do the impossible....Walt Disney!

I have been trying to get people to understand the importance of Commercial Hemp Farming in South Carolina and the World since 2006! Yes! I've written several letter(s) to Harris Pastides on this subject but had no response. I do need to get the Church involved to see that Hemp is not Marijuana like Hearst & DuPont brainwashed our Citizens in 1937 to save their Billions. HEMP IS THE MOST USEFUL PLANT ON THIS PLANET!

I have to thank Senator Jake Knotts for informing me that, "The Church is the New Plantation of the South and Controls the Masses by Pastors." Jake told me Hemp would never work until I convinced the Pastors of the importance of Hemp; I read your article in Sunday's State Paper and knew that you needed to be informed about the beauty of Commercial Hemp Production. Yes! I want to make a Trillion off my ideas when I express them!

Would you consider the greening of World by using the Hemp plant to start new forest and protect the ones we still have? Hemp grows the same amount of pulp per year per acre as Trees grown for 7 to 10 years. Hemp would produce lumber, wallboard and paper cheaper than using Trees! Hearst knew this and would have been ruined on his lumber holdings!

Hemp is the most environmental sound plastic that does not produce the pollution! Cloth can be used instead of cotton and doesn't use the pesticides that ruin the earth. Hemp Plastic is better than Fiberglass with less Pollution! Ford and Lotus are now using Hemp Plastic once again in their cars.

Medical benefits have been around for thousands of years and China still uses a lot of hemp today. Carolina Roche could reopen with Hemp Medicine. Hemp Milk, vitamins and food too!

I wish you would read my Face Book Page and see all the Hemp ideas that are out there now: Nike, Reebok, Ben & Jerry, and many other products are made from Hemp. We import \$500 Million in Hemp each year! Canada just put 20 Million up to up there export to U.S.; \$50 Million in 2005....2009 was \$286 Million in exports. We could rebuild Haiti with all Hemp made Products. No! Haiti could not be trusted with these factories since they are still unstable and may never be allow to control their destiny. These Factories are now standing empty that we need to make the products cheaper from Hemp. You know that BEMIS & SABIC took our plastic products to South America and left pollution behind for us to clean up. Hemp will clean air, water and land!

This is my passion and I do want to build Recreation Centers around the State like I had in Winnsboro Mill Village with profits. We can do this Nation Wide and reforest land and not use any land that food is now produced on. Ricky Loftin 4520 Monticello Rd. 9E Columbia, South Carolina 29203 (803) 771-4308 Hope to hear from you..... could you pass this along to Earth Ministry, Web of Creation, S.C. Green Churches and Sustainable Midlands and Columbia Climate Protection Action Committee?  
Thanks!

(803) 771-4308

President of University of South Carolina

Mr. Harris Pastides

Dear President Pastides,

I would like your help in getting Commercial Hemp Production into the mainstream of our society.

COMMERCIAL HEMP PRODUCTION is not illegal in the United States!

This Plant would put Trillions of dollars in the pockets of the people of South Carolina and enrich the World. Yes! I want to be worth a Trillion Dollar too!

The University of South Carolina could be in the forefront of this amazing Plant. Check: Tuesday – The State-April 28, 2009-D-3 – HEMP MILK! I have written ex-President Clinton about fixing Haiti problems with Hemp Production: food, vitamins, fuel, fabric, paper, plastic steel and power stations.

I need your help in getting Students to help put prospectus of HEMP PLANT in terms that I can present to professional people. Letter dated: 09-29-07 explains how I want different departments to help: Medical, Architecture, Legal, and Business Schools. Billions of Dollars could come to University of South Carolina with common sense and insight into the HEMP PLANT.

I have a cousin, Debra Lynn Geddings "Mean Woman", that teaches at U.S.C., could help me with University personnel.

Mr. President don't let this opportunity pass the State of South Carolina without us making Trillions! Everything is right at our finger tips: Closed Plastic Plant "Shop road", Plywood Plant "Kingtree", Biomass Fuel in Bankruptcy and paper plant closed in Augusta.

Please let me hear from you after you peruse these papers. I have contacted many important people but don't have the facts the University could help supply. Common Sense will win out in the Long Run. Can't never could till he/she gave it a try...! Thank You!

Sincerely,

Harris Pastides, President, University of South Carolina  
first letter 2007 [E-mail 2010]

Mr. Pastides, Congratulations on the appointment to: Manufacturing Panel. This would be a great time for you to reconsider COMMERCIAL HEMP PRODUCTION and the many usages that this plant will create. We are far behind Canada in research and production. Canada exports \$286 Million in Hemp to the United States each year. Our Farmers need this money! I have been in touch with your office since 2008 about this matter: Canada Hemp production has grown from \$50 Million in 2005 to \$286 Million in 2009! Do you see the pattern of growth going up?

Hemp: The Most Useful Plant On The Planet. No other plant has as many usages or grows faster than the Hemp Plant. The Power Station at University of South Carolina was made to run off Hemp not Wood Chips. Henry Ford build cars in the 1930's from Hemp plant and ran them too.....Ford is using Hemp again in the cars today. Hemp is better than fiberglass.....

Hemp is not illegal in the United States. Yes! Lies and Deceit by Hearst and DuPont ruined this crop to protect their billions in the 1930's but we could fix Mother Earth with this plant. HOW DO THE D.E.A., UNITED STATES ATTORNEY GENERAL AND I.R.S. ALLOW CALIFORNIA TO GROW MARIJUANA AND TAKE \$600,000.00 DOLLARS IN TAXES FROM BLUE SKY COFFEE SHOP IN OAKLAND, CALIFORNIA and hemp be illegal? Mr. Pastides, You have a Law School; Please answer: WHY THIS IS NOT DISCRIMINATION AND MALFEASANCE OF CRIMINAL ACTIVITY....CONSPIRACY TOO....

I want South Carolina citizens to lead the Nation in Hemp Production for the jobs and commerce! We need to take Insane Asylum on Bull Street and make that an all Hemp Products building Project and show the world what South Carolina can really accomplish. Yes! Would love to rebuild Haiti with all Hemp Products built in South Carolina too.... This is a real possibility and can work if we apply ourselves and use COMMON SENSE & INSIGHT....IMAGINATION TOO.....

Yes! I need a job and want to have Hemp For Mother Earth as a business in the research department at the Research Center. Robert Dobbs, Dr. Terry Walker (Clemson) and Curtis Loftis have endorsed this idea and have meeting with Curtis Loftis after election. I have reached out to Westy Bowen from Proterra Electric Bus in Greenville to consider using all hemp products for the Bus. Canada has an all electric car coming with all hemp products.

Don't let South Carolina continue to: SUCK-HIND-TIT-ON-A-BOAR-HOG.  
You, President of South Carolina, are suppose to lead a progressive outlook into  
the future and prepare us for sound jobs and environmentally friendly life. This is  
your chance. COMMERCIAL HEMP PRODUCTION IS THE NEXT BULL  
MARKET IN THE UNITED STATES.

Ricky Loftin 4520 Monticello Rd. 9E Columbia, South Carolina 29203 (803)  
771-4308 I'm just one person trying to get Billions of Dollars into South Carolina  
so that people can work and have products grown and produced in South Carolina.

Oh! I still need the Business, Law, Architectural and Medical Schools like I ask  
for in my Letter from 2008!!!! We can lead the Nation and the World in Hemp  
Production.....Will you help me?????

→ BAGS  
No Plastic in California  
2014

2007

- ❖ Dear Mr. Buffett, I have written and E-Mailed your office many times trying to get Commercial Hemp Production back into the limelight. This need is more in focus now than my first letter to your office in 2007.
- ❖ I would like to open all closed Plastic Plants in South Carolina and use Hemp plant for cheaper production. ~~SABIC~~ bought out ~~General Electric Plastic Division~~ in late 2007 and I know plastic can be made cheaper from Hemp.... ~~BEMIS~~ is another plastic division that could be brought down and return this product to the United States.
- ❖ ~~Plastic Shopping bags must go, U.N. ENVIRONMENTAL OFFICIALS SAY:~~ These bags could be made of plastic from hemp that would disintegrate in the landfills and produce fertilizer after six months. Hemp Fiber bags could replace these bags because they could be made so cheap.... Hemp Plastic can be made 10 times stronger than steel. ~~Popular Mechanics Magazine 1930's.....~~ DOW is shutting down two plants in Louisiana that make plastic....
- ❖ GROUP PROPOSES MASSIVE PROGRAM TO REFOREST APPALACHIAN MINE SITES: Lexington, Ky. This supports my letter(s) in 2007 wanting to use the Hemp Plant to cover the coal slag heaps with productive plants. Young trees will need cover and the hemp plant will provide this and become fertilizer and top soil when it dies in the winter. The colder climates will bring the hemp plant back each year without replanting. Look at Missouri and Kansas.... I wanted to do this to all strip mined land in the United States...?
- ❖ Jim Clyburn from South Carolina refuses to answer any of my letters but wants: A CLEAN, GREEN FUTURE? We can bring hundred of thousands of jobs and hundreds of trillions of dollars to this economy in the next few years with the Hemp Plant.
- ❖ ~~FEDERAL OK SOUGHT FOR FOREST OF CLONES:~~ This will bring disaster to South Carolina like the fish in the Mississippi River.
- ❖ The biggest laugh the Government put out was: FAKE TREES TO COLLECT POLLUTION BY THE INTERSTATE: What do you do with the pollution when you capture it in these fake trees. ~~Disposal cost plenty of money!!!~~
- ❖ Common Sense and Insight into this plant would bring Trillions of Dollars! I want a trillion for myself.... There is so many things that need to be done with this plant that we haven't even scratched the surface. Thanks for your time and hope to finally hear from you. Ricky Loftin 4520 Monticello Rd. 9E, Columbia, South Carolina 29203 (803) 771-4308

Jesup, Georgia 31599

Berkshire Hathaway  
Mr. Warren Buffett  
3555 Farnam Street *suite 1440*  
Omaha, Nebraska 68131-3302

Dear Mr. Buffett,

I have been in contact with alot of people trying to see this idea of HEMP? The mass production for commercial value will be TRILLIONS in a very short time.

I read U.S.A. TODAY 05-07-07 about you showing respect to your friend, William Ruane, by taking on people to make money and maybe: Take your place. I'm not that person; I just have an excellent idea that's time has come "HEMP" and needs **BIG MONEY** to force this enviromentally sound PLANT into the general publics view.

BIOMASS FUEL PROCESSING PLANTS INLAND ZONES OF AMERICA:

Delta of Mississippi -- Tenn.-Ala.-Ark.-La.  
Nebraska -- Tex.-Ka.-Okla.-Colo.-Mo.  
South Carolina -- Ga.-N.C.-Fla.-Eastern Tenn.  
Ohio -- Ind.-Ill.-Ky.-W.Va.-Va.-Penn.

There was big talk a few years ago about moving oil refineries so put BIOMASS' PLANTS next to HEMP producing fields.

Take Dominica Republic for refinery and make Haiti a green beautiful island once again. Plant trees and HEMP to bring beauty and food back to that island.

Mead Westvaco is selling 400,000 acres in South Carolina and other areas of United States. What is not used for growing hemp put to use for enviromentally friendly habitat for humans and wildlife by using HEMP produced products.

California is losing the Nut trees because of the weather pattern changing in Northern California so put a BIOMASS Fuel Center on that site.

South Carolina Politicians are scared of HEMP PRODUCTION. Leon "Poncie" Westberry has talked with several and they like the idea but scared of Public reaction. [Bet they would like to have gas at under a \$1.00 a gallon] Poncie (843) 617-8603

Letter(s) are enclosed for your peruse. I want to be a billion(s) aire ~~off~~ this idea and spot on board to steer America on good course. Would sure make Mother proud too.... Take care and let me know you got this letter.

**FIVE TRILLION PROFIT IN SEVEN YEARS!!!**

Sincerely,

*Ricky Len Loftin*

Mrs. Abigail Johnson

Fidelity Investments

82 Devonshire Street

Boston , Ma. 02109-3605

Dear Mrs. Johnson,

I am trying once again to get your Interest in COMMERCIAL HEMP PRODUCTION!? This Hemp Plant is taken off and 27 Countries now grow plant for industrial use. Canada, Romania and Hungary export this plant to United States and make 100's of Millions off American people. Yes! I am unemployed and look after my 90 year young Mother that has early stages of Memory Loss. I believe that unsterilized Hemp Seeds would restore Mother's Memory!!!? I also still believe that we could make trillions of dollars off this plant and put thousands of people to work in United States.

Would like to use Hemp Plant to take poisons out of ground, air and water. We could clean up coal slag heaps, industrial spills and reforest places like the Grand Canyon with the Hemp Plant. Ted Turner has the upper hand in growing Hemp out West with all the land that he has bought. I would like to get all State and Federal land that is not in use and plant the Hemp Plant. The Buffalo Roam State Park would be a great place to get Hemp started and leave plenty of food and fertilizer in the ground. All Bio-Fuel Plants could benefit from the Hemp Plant. We could finally be out from under Big Oil and have fuel Nature Grown. Put all smoke stacks at Coal Burning Power Station next to the ground to feed the Hemp Plant!!! You never will find a better plant for Eco-Friendly and pollution eating than the Hemp Plant. Yes! All press wood two by fours, two by sixes and two by eights could be made from Hemp. Haiti could

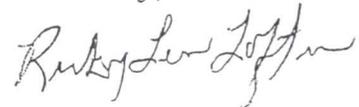

have all the bio-fuel, electricity, plastic, paper, wood, wallboard, food, vitamins and other things produced from the Hemp Plant. Use the University of South Carolina Power Station built for 19 Million Dollars to supply power made from the Hemp Plant. Haiti could grow year around and have many crops. I would like to get contract to build Power Station in Orangeburg, South Carolina where Dubai is building and inland Port. This Power Station came from a Canadian Firm that was going to use Hemp for fuel supply.

I have been after this Hemp Project since 2005. I sent you a letter 11-20-08 that was never was answered. Two books that I have read in the last two months give you a good idea of the investment potential in the near future: ~~HEMP~~ by Mark Bourne and ~~HEMP FOR HEALTH~~ The Medical and Nutritional Use of Cannabis Sativa by Chris Conrad. The United States Government has a lot of Studies that could put Hemp in the mainstream of American life and trillions of dollars in our pockets.

This is cutting edge investment stuff that will bring in Trillions of dollars. I would like to get all bio-fuel centers that are living off hand-outs from United States Government and make a profit off COMMERCIAL HEMP PRODUCTION. Just Military contracts for fuel in South Carolina would be Trillions of Dollars! South Carolina could have at least four growing seasons. I would love to take property that is barren and turn it into productive land in four years. No Plant has as many usages as the Hemp Plant. No Plant would help Global Warming as much as the Hemp Plant. COMMON SENSE & INSIGHT is what is needed to put this plant to work. Of Course....Someone with lots of money behind this plant would make things a whole lot easier!?

Thanks for your time and hope to hear from you soon.

Sincerely,

Ricky Len Loftin

Ricky Len Loftin      04-07-14  
Homeless and Jobless

Professor Terry Walker  
Clemson University

Dear Professor Walker

Hope this letter and the other(s) will critique your interest in helping Hemp For Mother Earth. I've been looking for a job forever but my convictions stand in the way. There is an upside with Entrepreneurship Grant endeavors by my being a minority! Helping an ex-felon succeed????? This is why my ideas will work only if I have legal help with paperwork to get Grants and such from Department of Energy for environmental safe jobs. Common Sense, Insight, Imagination & Ingenuity will lead into a new frontier like Star Trek except using Hemp. The Political {Criminals in Suits} structure knows me well and when Federal Backed Grants create new unique environmental small businesses that will only enhance my word.

Take over beautification of all landfills. (Senator in Florence would love to create something new to stop eyesore and smells. [State Paper a few months back] {You know the Federal Government spent Millions on studying Cow farts and burps} .... Taking poisons out of air, ground and water with Commercial Hemp will lead to many new jobs!!!

Fort Jackson, Bomb Plant in Aiken and other's could be cured by using Hemp! Do we know this; NO!; but we can be the first to try. If? You don't contact and ask; You'll never know. I've contacted the top folks and still need help to break through which is paperwork. We are talking Billion and if we could fix Haiti and Japan with environmental sound objectives; We could be on cover of Rolling Stone!

Gas and Diesel is out of sight now and very hot topic with Senator's wanting clean Diesel. Grants to study from STATE and Federal Government (Military since S.C. is pro military state) the greater benefits of Hemp Diesel. The Senate will have Hemp on Floor this term and all know me. Renwick in Fairfield County (Winnsboro) does fuel from old restaurant grease. Senator Creighton Coleman told me, "I could have his land to grow Hemp on when law passes. Small businesses creating homegrown and manufacturing jobs for our Citizens!

Yes! Selling Israel cows, chickens, pigs and goats while using Hemp and Kudzu would be a great benefit to the world. Washington STATE has cut all poisons and chemicals out of hogs with use of hemp! I've asked the Governor to create small farms for service men to grow and produce homegrown products. The vast amount of cheap paper mill, federal and state lands that could/should be turned into small farms.

I do need help. Would appreciate anything you could do for me. A payday/salary using Federal/State Grants would sure put a smile on my FACE...Peace & Happiness
