**scstateparks** You never know “hoo” you’ll find on a trail. Let’s celebrate Wildlife Wednesday with this Barred Owl captured from a trail cam at Myrtle Beach State Park! 🦉 Barred Owls are primarily nocturnal but are known to call and hunt during the day. #DYK “the eyes of an owl are not true “eyeballs.” Their tube-shaped eyes are completely immobile, providing binocular vision which fully focuses on their and boosts depth perception.” - @audubonsociety

**investor\_frank** Till date @alex\_frank\_expert\_trader\_ has been a great inspiration to me and my family. For a start I deposited \$500 and after a week I got \$5000 return . His accuracy and reliability can't be compromised
