Forecasters following Hurricane Michael have spotted something spooky in the satellite imagery, [AccuWeather reports](#).

On Tuesday morning, meteorologist Jim Dickey in Ft. Myers, Florida, tweeted that the storm took on the appearance of a skull in its infrared imagery as the eye began to clear out.

The same phenomenon was spotted in 2016 with Hurricane Matthew.

The 2018 hurricane, currently a category 2, is expected to make landfall Wednesday.
