---

Thanks, Chaney. So \$493m fed + \$114m state + \$181m private + \$82m SBA = \$870m

Also, the beach renourishment figure falls under the feds?

Gavin, thank you for your patience.

Total estimated cost to date: \$870 million

The estimated total direct cost to state government is \$114 million

The estimated total direct cost to the federal government is \$493 million

ON BACKGROUND: As the governor has said all along, we will not have a final number to share for some time (final costs will account for non-profit activity, private loans, claims that are still open, and out of pocket costs). This is the best estimate as of today. The difference between the two numbers (state/fed) is that the total number includes SBA loans and private/flood insurance.
