Hello Chaney...

I'm trying to get this over to SCDOT, but no media person is listed on their website. Any chance you can forward. This looks like a lawsuit waiting to happen if this woman falls after notifying the state as much as she did.

Thanks...

Subject: Drive way apron

Mr. McGinty, I'm not sure if you can help, but it's worth a try. For 6 months I have called SCDOT about a hole in the apron (which belongs to DOT) of my driveway. It started out about six inches and you could see the pipe (I think plastic or pvc - I don't know the difference) in the hole. I first called in April, 2015 and they "put it on the list" in May, it was still "on their list". In June the six inches had grown to 17" long and I was told "they were assessing the problem". July, August and September, they are still "assessing the problem. Now the hole is 22" long and a split across the total apron. I believe I talked to a "Jackie" at least 4 of the times. Normally, DOT does not take this long but my entire entrance to my drive could just fall through. I'd appreciate any feedback you could give me. I am giving you the number of the SCDOT Maintenance facility that I have called 6 times, once a month it is: 803-327-6186.

Thank you.
