Dear Tony,

I have an important new report to share with you. The Alzheimer's Association [Alzheimer's Disease 2015 Facts and Figures](#), released today, highlights the devastating human and economic costs of the Alzheimer's epidemic. Alzheimer's disease is taking more than memories — it's taking lives.

Alzheimer's disrupts the lives of individuals, families and our communities, killing more than breast cancer and prostate cancer combined. Between 2000 and 2012, **deaths from Alzheimer's disease increased 69 percent**, while those attributed to the number one cause of death, heart disease, decreased 16 percent.

We must take action to change the course of Alzheimer's disease. Help us spread awareness by [downloading the report](#) and [sharing the facts](#).

Thank you,

Donna McCullough
Vice President

The [Alzheimer's Association](#) is the world's leading voluntary health organization in Alzheimer's care, support and research. Our mission is to eliminate Alzheimer's disease through the advancement of research; to provide and enhance care and support for all affected; and to reduce the risk of dementia through the promotion of brain health. Our vision is a world without Alzheimer's disease®.
