Sandra Brosious KNOW THE FACTS, TAKE OFF THE MASKS!!! The link for the PDF version:

<https://drive.google.com/file/d/1mG9y-WCQmZVqdMu2HohK2M4E9uiRzA1Z/view?usp=sharing>

FACTS OVER FEAR
Know the facts, take off the masks!!!

KNOW THE RISKS FOR WEARING FACEMASKS

Who you shouldn't wear a face mask if you're healthy
According to Anne, Professor Ben Muller at Curtin University School of Public Health, Australia, before they are actually proven to be effective, masks may be more harmful than good.

1. Wearing facemasks does not make sense. They can catch up respiratory droplets and other substances wearing them, according to Anne. Professor Ben Muller at Curtin University School of Public Health, Australia, before they are actually proven to be effective, masks may be more harmful than good.
2. Face masks are made with an aerosolizer, creating a mist that can be inhaled. All types of masks, even surgical masks, except for N95. While facemasks are useful, face wearing a good mask, you are still allowing 70% of the aerosol to go through.
3. The World Government's advice is to wear them as a perfectly fit healthy person in the street, it is not going to prevent you from getting infected.
4. Roger Cook, Health Minister "to wear them as a perfectly fit healthy person in the street, it is not going to prevent you from getting infected."

Might Wearing a Mask Worsen Your Odds of Infection?
Risk: Infection, Asthma, Botulism, Coronavirus with Dr. Atkinson
<https://www.youtube.com/watch?v=9F010>

1. Wearing a mask will cause you to have more conditions and give more calls a home and amplify any viruses. It is overall expensive. It will take away your super antibodies.
2. Wearing a facemask causes you to draw in your infectious aerosol and prevent the spread. Face amplifying and will cause you to have more conditions and give more calls a home and amplify any viruses. It is overall expensive. It will take away your super antibodies.
3. The World Government's advice is to wear them as a perfectly fit healthy person in the street, it is not going to prevent you from getting infected.
4. Roger Cook, Health Minister "to wear them as a perfectly fit healthy person in the street, it is not going to prevent you from getting infected."

Universal Masking in Hospitals in the COVID-19 Era
Michael Domingue, M.D., M.P.H., Charles B. Morris, M.D., M.P.H., Julia Stricker, M.B.A., Madelyn Pearson, D.P.H., A.N., and Brian S. Brody, M.D., Ph.D.

Face Masks Pose Serious Risks to the Healthy
Dr. Ronald Brody, Senior Researcher
<https://www.dailymail.com/health/face-masks-pose-serious-risks>

1. Face masks have been shown to amplify respiratory viruses, if you breathe them in.
2. Face masks have been shown to amplify respiratory viruses, if you breathe them in.
3. Those with already pre-existing conditions like COPD, emphysema or pulmonary fibrosis, when wearing a facial mask of any kind can cause severe worsening of lung function.

3. Reduction in oxygen levels (hypoxia) is associated with an impairment in immunity. Hypoxia can inhibit the type of main immune cells used to fight viral infections called the CD4+ T lymphocytes. This occurs because the hypoxia increases the level of a compound called hypoxanthine (Hx) in the blood (Hx), which inhibits T lymphocytes and produces a general immune response of cellular stress. This can also affect the control of the infection, including COVID-19 and making the consequences of that infection much greater. It occurs when mask may only seal off the air from the mouth and nose and not the breathing, much more serious.
4. People with cancer, especially if the cancer has spread, will be at a further risk from prolonged hypoxia as the cancer gene that is a byproduct of the infection and the hypoxia. Low oxygen also prevents information which can prevent the growth, invasion and spread of cancer. Reported results of hypoxia have been proposed as a significant gene that is a byproduct of the infection and the hypoxia. Low oxygen also prevents information which can prevent the growth, invasion and spread of cancer. Reported results of hypoxia have been proposed as a significant gene that is a byproduct of the infection and the hypoxia.

Advice on the Use of Masks in the Context of COVID-19 Guidance
World Health Organization
<https://www.who.int/news-room/qa-20200623-covid-19-use-of-masks>

1. There is no evidence wearing a mask by a healthy person in a community setting can prevent infection with respiratory viruses, including COVID-19, and protect against "asymptomatic spreading" or "infectious spreading" (infection from respiratory viruses, including COVID-19).
2. The WHO recommended general wearing medical masks in the "top route" a face mask of "any" against COVID-19, which is further worn out of its way to tolerate that there is "no evidence available on a [mask] if evidence is provided to prevent infection."
3. The use of masks made of other materials (e.g., cotton fabric), also known as non-medical masks, in the community setting has not been well studied. There is no current evidence to make a recommendation for or against their use in the setting. While it is unclear why non-medical masks are recommended to be used, understand the effectiveness and efficacy of non-medical masks, WHO is also strongly encouraging countries that had not recommended for the use of masks to people in the community to conduct research on this critical issue.

Evaluation of Why Face Masks Do Not Work (excluding other studies)
<https://www.researchgate.net/publication/342000000>

Study on CDC website which reviewed ten different randomized clinical trials, world-wide, reviewing high infectious respiratory virus transmission which found "no significant reduction" in "transmission with the use of face masks."
<https://www.cdc.gov/media/releases/2020/s0623-covid-19-masks.html>

at 14:51:46 on 6/22/2020 UTC

Sandra Brosious END THIS CHARADE!! THE WORLD HAS GONE INSANE OVER THIS STUPID VIRUS! Let's get back to normal instead of placating to the Deep State agenda to push One World Order!!!

at 14:52:43 on 6/22/2020 UTC

Dwaine Stone Good morning ☀

at 15:10:39 on 6/22/2020 UTC

Sam Willard This is RIDICULOUS
