It's imperfect, but it's a start. I pulled this together last week, when we were talking about a "chaser bill" to follow H.3066 to fight for some of the additional reforms we haven't been able to get the votes for so far (the rest of procuremnet, etc.). I'll need to be reformatted as an amendment to H. 3066 instead of a second bill...we can discuss whenever.
