John/Nick, The Energy Office has secured funding through the Tremaine Foundation (a non-profit) and assistance from the DOE Technical Assistance Program (TAP) to put together a forum to assess obstacles/best practices etc so that we might better promote performance contracting in our state. As part of our discussion, the Documents Committee came up and on our cal today, Dale Hahs with the DOE TAP brought up some interesting comments about the documents toward which we are working as well as about how to ensure appropriate competition without perhaps requiring three separate investment grade audits. Would you have some time to talk with us and Dale in the next week or so? Let me know. Thanks, Ashlie
