THE FUTURE OF FOOD: Feeding the Planet During Climate Change

*The Forum at the Harvard T.H. Chan School of Public Health presented jointly with PRI's
The World & WGBH*

Tuesday, December 13, 2016
Live webcast: 12:30-1:30pm ET
ForumHSPH.org

We also will stream live on Facebook <https://www.facebook.com/Forumhsph/>

By 2050, a projected 9.7 billion people will inhabit the planet. How will we produce enough nutritious food to support this burgeoning population and ensure access to food resources, particularly as climate change stresses the environment? This *Forum* will explore innovative methods and systems for producing food, as well as new types of products and underutilized sources. The panelists will talk about emerging technologies, including advances in genomics and aeroponics, to grow food. They also will discuss ways to sustain at-risk food resources made vulnerable from climate change, and the impacts for populations in developing countries.

EXPERT PARTICIPANTS

[Gary Adamkiewicz](#), Assistant Professor of Environmental Health and Exposure

Disparities, Harvard T.H. Chan School of Public Health

[Caleb Harper](#), Principal Investigator/Director, Open Agriculture (OpenAG) Initiative, MIT Media Lab

[Calestous Juma](#), Professor of the Practice of International Development and Principal Investigator, Agricultural Innovation in Africa, Harvard Kennedy School; Co-Chair, High-Level Panel on Emerging Technologies, African Union

[Margaret Walsh](#), Senior Ecologist, Climate Change Program Office, U.S. Department of Agriculture

MODERATOR

[Peter Thomson](#), Environment Editor, PRI's The World

Spread the word:

Send our panelists questions in advance to theforum@hsph.harvard.edu

We'll be conducting a live chat on *The Forum's* [Future of Food](#) web page.

Tweet us @ForumHSPH #futureoffood

Forum video will be [posted on-demand](#) after the event.
