FROM: Chandra Jacobs, US Veteran

I just recently submitted a complaint to the SC Human Affairs Commission regarding a possible fire hazardous in the community.

A truck is cranked every morning and left running with a large amount of combustion due to the age of the truck. It seems to not meet emission standards. I spoke with the Blaney fire department he said there was nothing he could do about it because it is a federal regulation.

I my self continue to have acute sinusitis due to all of the combustion that comes from not only the truck running but as well as the local school bus.
