---

In the Anderson Independent, it stated that 26,000 disabled human beings would be cut from special programs that are very much needed throughout our state. Please tell me Mr. Bryant why is it that millions of live, human beings can be murdered in our country, right here in our state and it is allowed and never questioned. But here this many citizens who are specially challenged are gonna be dropped, forgot about and lost due to this. I realize you are just one man, but can you please help people find out why this is? Thankyou
