South Carolina State Parks

at 12:35:14 on 10/26/2021 UTC

#SCBatWeek is Oct. 24 – 31! South Carolina is home to 14 species of bats! These species are all insectivores that provide insect pest control estimated to save our state's agricultural industry over \$115 million/year while also reducing the spread of mosquito-borne viruses. Click here for a list of statewide events for bat week: <https://fal.cn/3jki8> Below is a video of Rafinesque's big-eared bats which we have in SC and manage at Hampton Plantation!

Evan Stiner We went to Hampton Plantation this last weekend and got to see a pre-Bat Week talk. The ranger, that I hate can't remember her name, did a great job.
