Beth,

Can I also get the following?

- 1) millage rates for manufacturing property (10.5%) for each county
- 2) assessed value of these properties for each county

Thanks

Sen. Bennett,

Katherine Veldran asked me to send you information re job growth over the past five years. I reached out to David Clayton, the Director of Research at the Department of Commerce, and he sent the information below. Please let me know if you need additional data or information.

Best,
Beth Webb

Beth,
This is from the Bureau of Labor Statistics, Current Employment Statistics program. It measures employment at the business level, so is a good measure of a jobs count. These numbers are a little different from the local area unemployment statistics programs, which surveys residents instead of businesses. The main distinction is that with the data below, if a person is employed in two firms, they

will show up twice. Thus, it is the best measure of jobs and not of total employment. More info is here:
