Subject: For your records - potential fraud

Hello,

I have received two strange phone calls in the past two working days. I wanted to make sure I recorded this information with the proper authorities. After an hour of being passed around to different government agencies, I'm still not sure where the proper depository for this information is, so your department(s) are the best I could find.

Strange call #1

Friday afternoon (7/21/17) I received a call from 843-642-1119. The man I spoke to said that a Vivint Solar Rep had come by his house and gave him a quote for a solar install with their product, my product and one or two other companies.

I have no idea why this other company would be providing quotes for us. We have no connect with them. Despite our licenses in this area, we do not even provide solar installs at this time.

I told the man that we didn't do installs and we were both very confused about why this other company would be sending quotes with my name on them.

Strange call #2

Today (7/24/17) I received a call from 781-366-7211. The man I spoke to said that he had received (4) quotes including one from my company and that he wasn't going to go with any of the quotes. Again, I have no idea how he would have gotten a quote with my companies name on it.
