## Events Happening in August

Hello Ricky

Do you love learning the different ways **hemp** can be used in daily life? Get a hands on experience by building with hemp or painting on it! Check it out!

Attend the Soil not Oil conference then head down to **Trinidad, CA** for a **workshop on hempcrete**. You will also learn about hemp farming as it relates to fiber markets, sustainable construction and economic development opportunities from tribal and other communities. You will build a wall as a demonstration for what's possible in future community development projects where resiliency is of utmost importance. Attend or donate! Learn more [here!](#)

In this **hempcrete workshop in Boulder, CO** you will learn how to design and plan a tiny hemp house project, sourcing of materials, being successful working with the building department and the basic do-it-yourself hempcrete recipe including hands on casting a hemp wall

and ceiling, interior and exterior finish options, plastering and jobsite organization. Learn more [here!](#)

Come learn how to paint on **hemp confresco!**  
Experienced and novice artists are welcome. Artist Christine Nossoughi has engineered a sustainable and lively canvass using a recipe made of hemp. It looks like stone but is as light as a feather. Join us for this fun and educational event in which you get to see your painting come to life on the amazing resourceful canvass of hemp! Will take place in Denver, CO. Learn more [here!](#)

Interested in **sponsoring any of these events?** Ask me about our sponsorship packages!

**Sincerely,**

Alli Cloyd
