

- 1) We should start the recommendations with the vision and principles for the Task Force.
- 2) We should then state the overarching conclusions that we have reached such as the need for a Strategic Plan, Data Collection and on-going monitoring to confirm that we are making progress, and the need for a true comprehensive

approach. There will be a significant need for additional funding over time.

3) Tom's comments that we focus too much on state agencies is on target. We need to emphasize that this is a statewide partnership effort and that we need to have government, private for-profit and non-profit organizations as well as volunteers to make our efforts work in providing long term care and support services for our citizens.

4) We definitely need data! We need to show at least some of the big picture pieces to help the Steering Committee and the Board make sense of the recommendations.

5) If we do this, then we can show the sub-committee recommendations with the understanding that they will be collapsed into a more coherent and streamlined final report.

I hope that these comments help us move forward.

Bruce Bondo

Subject: LTC Recommendations and Voting Process

Hi everyone,

Attached please find the document containing the slate of LTC Taskforce recommendations for your review. As mentioned in our meeting earlier this week, **please do not circulate this list beyond the steering committee.**

Please respond to this email by the close of business on Wednesday, November 26 in order to place your vote on the package of recommendations to be presented to the IMPH Board. Ultimately, you will have the opportunity to weigh in on the final report, which will present these recommendations in a more seamless, coordinated package with appropriate supporting evidence. At this point, we are simply asking for your approval on the package that will move forward to the IMPH Board.

Here are the voting options:

- I approve the package of recommendations as presented.
- I approve the package of recommendations **with the following exception(s)**...
 - Please make sure to identify the committee name and recommendation for any noted exceptions. A short description of your concerns would also be helpful.

As a committee, you agreed that you would "reply all" when casting votes so that all steering committee members can see your feedback. (If you have detailed suggestions about necessary supporting evidence or messaging considerations, you can certainly send that directly to me so as to reduce the review burden of the entire group.)

We will have the chance to gather in mid-December to talk over any discussion points that come up via the voting process and/or IMPH Board review. And, as noted above, you will also have a chance to weigh in on the substance of the final report once it is compiled.

As always, I appreciate your considerable support of the LTC Taskforce. I hope you all have a wonderful Thanksgiving celebration with family and friends!

Thank you,
Eleanor
