Let's talk trees.....Trees are oh so important to our lives, and have an amazing impact on our environment. Did you know a tree can absorb as much carbon dioxide in a year as a car produces? If you were to buy a new tree for your yard, what kind of tree would you buy and why?

**Gayle Maas** Weeping Willow

**Dawn Kendall Mewhorter** My husband just bought several red japanise maples. But I would buy a dogwood or two. I love their blooms, plus it was my mother's favorite tree and she just passed away this April. So I would plant it in her memory.
