

HABS/HAER INVENTORY

Building Number: 150
Structure Name: Building 150, Garbage House
Location: United States Marine Corps Recruit Depot at Parris Island, SC
Construction Date: 1941
Use Original/Present: Garbage House
Rating: 3
Condition: Good, no apparent alterations
Description:

This is a 289 square foot, single story structure, rectangular in plan, built on a poured concrete foundation. The exterior walls are of brick laid in an English bond. The gable roof is of slate with a tile crest. The gable ends have a band of corbelled brick up each side, with short returns. There is a single steel door with louvers at the front of the building. On all four walls are panels of brick latticework with soldier course lintels and a sloped header course sill.→

History:

Building 150 was constructed in 1941 as a garbage house. It was built as part of the massive mobilization efforts that ensued upon the outbreak of World War II in 1939. Severe damage caused by a hurricane in 1940 served to expedite the new construction. This expansion, which continued throughout World War II, was launched in order to better accommodate the increased numbers in personnel. This required the construction of adequate facilities for the 240,509 recruits who would pass through the installation during the war. The construction of numerous prefabricated buildings, the expansion of Page Field, and the addition of women's facilities were among the major developments effected at Parris Island during the war.

This building is located in the World War II Subdistrict of the Mainside District, which is the main administrative and training area at Parris Island. The buildings in the subdistrict are associated with increasing activity at Parris Island shortly before and during the participation of the United States in World War II.

Significance:

This building is a contributing element of the World War II Subdistrict of the Mainside District at Parris Island. The building is significant in that it retains integrity of location, design, setting, materials, workmanship and feeling; and for its association with events that have made significant contributions to the broad patterns of our history (WWII).
