**Unfortunately that isn't possible when we cannot get in line when the line is on a highway. That is illegal. We would have to cut in line. Maybe you could create a golf cart lane for when the line is too long. Something to consider. Thanks.**

Wondering if you count golf carts as vehicles? We were not able to get in line this morning, as the line went clear out to the highway where we are not allowed to ride. We had to turn back and that was a difficult process, as oncoming cars thought we were cutting the line. How should we handle lines in our golf carts? Or are we just out of luck?

You would have to wait in your golf cart just as if it was a vehicle.
