"The Governor continues to push to see the Jasper Ocean terminal come a reality. The development of the terminal is a game changer for the region as maritime traffic increases with the expansion of the Panama Canal. The merits for Jasper speak for themselves and the Governor is confident that Jasper has the support of the South Carolina Ports Authority and our Georgia partners. "

Doug:

Working on a story for tomorrow's paper about the proposed Jasper County port. County officials were at a meeting last night, seeking support from some local maritime groups to nudge state officials and S.C. State Ports Authority to move faster with the planned port. They said permits should have been applied for already since it appears the port will be "delayed by two years"

Any comment from Gov?

Thanks.
