Green Schools Summit 6 1 11.ppt

PURC Presentation 01 14 11.pptx

SC Net Metering 2011 Overview.pptx

---

Christian, Attached are a synopsis and a PowerPoint from the Green Schools Summit prepared by Trish Jerman here in our office (I am copying her so you will have her email), as well as two PowerPoints on net metering, one put together by the IOUs and one by the coops for a presentation to the PURC Energy Advisory Council. Also, the link for the net metering study from our website is <http://www.energy.sc.gov/publications/Final%20Net%20Metering%20Report.pdf>. We are on the VACAR grid. Meant to mention one other issue to you Friday and that is the possibility of a Public Benefits Fund – this has come up several times and would be a great mechanism for funding energy efficiency projects. Thanks, Ashlie

Here are (1) the synopsis and (2) powerpoint I did for the Green Schools Summit. I looked to be sure nothing controversial...you should do the same, just in case! Might help them understand what we do, since it has the usual opening slides and stats galore. Believe Nicole is meeting with them late this afternoon.

Do you have the link for the net metering study from our website?
