Common Roots of Cybersecurity Difficulties

Information security is getting harder each year, driven by the dangerous threat landscape and increasing IT complexity. In the past, security professionals addressed the latest security threats with new security software or hardware gateways but this strategy no longer works. This paper introduces a solution that can help implement effective controls to prevent common attacks and fully secure your organization. **Download now**

Best Practices in Information Governance

Did you know that 52 percent of information like Social Security numbers are not currently protected? By December 31, 2016, federal agencies are expected to have implemented the Capstone Initiative for best practices in information governance. Check out this infographic to learn more about how information governance will continue to impact your agency. **Download now**

The Tell-All Guide to Securing Mobile Apps

Mobility has given people new freedom to work anywhere, on any device—but it has also added new complications for IT. Learn how Citrix XenApp helps people be productive on any device. **Download now**

10 Essentials for Your ERP

The cloud eliminates many of the barriers that keep companies from implementing or upgrading their software. More importantly, it enables you to focus on your core business operations instead of managing IT. Cloud-based ERP might be right for your business but where do you start? This white paper contains 10 questions to ask when considering a cloud-based ERP. **Download now**
