Subject: ADEAR publication: Common behavior changes in people with Alzheimer's

Dear Grantees and Partners,

We wanted to make you aware of a new tip sheet from the Alzheimer's Disease Education and Referral Center. See below announcement.

National Alzheimer's and Dementia Resource Center team

Alzheimer's disease can [change how a person acts over time](#). You may see behaviors like:

- Getting upset, worried, and angry more easily
- Acting depressed or not interested in things
- Hiding things
- Wandering

Caregivers may not be able to stop these changes, but there are ways to cope. Read about them in our tip sheet [Managing Personality and Behavior Changes](#). This tip sheet is available to download as a PDF and an e-Book (both ePub and MOBI formats).

Share this info on social media with the following message:

#Caregivers—learn how to cope with common behavior changes in ppl w/
