Pivot your strategies to address
Commercial Card fraud

Bank of America
Merrill Lynch

2016 has been an unprecedented year in terms of sophisticated card fraud scams. The speed of transaction processing today presents a challenge for timely detection and response to possible card breach events. While widespread EMV adoption has made strides in addressing security issues and decreasing card present fraud, the Card Not Present (CNP) channels are targeted as fertile ground for fraud attacks which are projected to increase abruptly and exponentially in the next few years.

What can companies do to help mitigate the impacts of this spike in card fraud?

Join this webinar to:

- Understand the impact of changes to payment security in the commercial card landscape
- Learn about preventive measures to combat counterfeit card fraud as the industry migrates to EMV
