Contract for Engineering Services to  
Upgrade and Widen S. C. Route 101  
in Spartanburg County

Pursuant to the Commission's previous action of 9-17-92, authorizing the Department to seek consultant services to upgrade and widen S. C. Route 101 in Spartanburg County, the Department has entered into a contract with Wilbur Smith Associates. Work is to be funded under the STP, NHS and IM Programs.

\*\*\*\*

Recommendations - 12/17/92

Supplemental Agreement No. 14 with  
Wilbur Smith Associates

It is recommended that Supplemental Agreement No. 14 to the Consultant Agreement dated December 3, 1976 between the Department and Wilbur Smith Associates be approved. The effect of this supplement is to extend the scope of services for construction management of the first construction contract on the Scarborough Bridge (File No. 10.158A) which is part of the James Island Expressway. These services were originally provided under Supplemental Agreements No. 4 & 11. This extension is required due to the extended construction period on this project. Due to delays and additional work, this project will extend beyond the original construction period and the contract maximum amount for the consultant services will be exceeded before the completion of construction. The amount of the extension would not exceed \$194,016.00. Funding for this work will be under the Engineering and contingency item previously allotted for this project for Charleston County.

Recommendations - 12/17/92

Supplemental Agreement No. 1 with the City  
of Conway - Perimeter Road Study -  
Horry County

The Department requests Commission approval to enter into Supplemental Agreement No. 1 with the City of Conway for additional studies on a possible perimeter road around Conway in Horry County. The studies may include a traffic model, preparation of environmental documents and right of way and construction plans.

An environmental overview was previously performed by Parsons, Brinckerhoff, Quade and Douglas (PBQD) for the city utilizing County "C" funds. The city proposes to supplement their agreement with PBQD for this additional work, which would be funded with Federal funds since the Perimeter Road project was recently added to the Grand Strand Area Transportation Study (GSATS) and Transportation Improvement Program (TIP).

The maximum funding for this agreement is \$500,000.00. This amount for preliminary Engineering was recently authorized by the GSATS Policy Committee.

Recommendations - 12/17/92

On-Call Engineering Services  
Signal Systems

---

The Department requests Commission approval to advertise for and select consulting firms for the purpose of providing on call engineering services for the design of signal systems. With the cooperation of municipalities where appropriate, the Department anticipates contracting for the design of six traffic signal systems within calendar year 1993. The purpose of on call agreements is to expedite the design of each system.

The work in each instance will involve conducting appropriate studies to delineate subsystem limits, design each signalized intersections, design the coordination/communication routing, the control center for the system and prepare plans, special provisions for contracts and other associated tasks. The number of signals in each system will vary and be determined by the Department in cooperation with involved municipalities. Department specifications and standard/typical sheets will be used.

Funding for the design of each system will be from the same source as the planned funding for the construction of the system. Funding is expected to be NHS or STP Federal Aid Funds. The estimated sum total of design work for all six systems is \$491,000.00.
