---

I can live with 2009, then. If we get it tomorrow, we can still get it into a chart for the book. Thanks.

Hey!

Just got an update from our folks. If data from the 2009 tax year is OK they can have you some information by close of business tomorrow. For any more recent year it will take several weeks according to our Business Objects team. Please let me know how you'd like for us to proceed.

Thanks

Hey!

I've got our folks looking into your request, in particular Terry Garber who heads up our Business Objects unit. I've talked to Terry some and was trying to allow her more time to review your request but I didn't want to wait any longer to get back to you. Her initial comments were they could do it but it would take a few days due to having to

write a program to do it. We'll go ahead and start the process to get the information you requested. I'm sorry it's not readily available. Please let me know if there's anything else you need or we can tweak your request to help expedite it.

Thanks

Meredith,

If you look at page 2 of the attachment, they present data on the number of anticipated filers (of individual income taxes), by income range, which is generally in \$5k or \$10k intervals. I'm looking for the same data by income tax bracket (no net liability, 0%, 3%, etc.) instead of by income range. Do you have that on hand? If not a guess for 2013, a recent year would be fine...but ideally, I need it this morning, if that's possible. Thanks. Sorry for the short notice.
