Subject: CWRC Information

Good morning –

The following is the position of the technical colleges with regard to your question on proctoring. We will still be contributing the same funding amount as we do now to the Initiative and would still need the flexibility for charging fees as needed. This would different for each individual county as they build their county initiative.

Please let me know if you have any further questions –

Thanks, Mandy

The CWRC initiative will be developed as a county initiative and will bring multiple partners to the table to include Economic Development, K12, Adult Education, Voc Rehab, Technical Colleges, County Administrators and Business/Industry. Each county will develop a partnership among all statekholders in order to meet the CWRC county goals.

The Technical Colleges will play a major part in the CWRC initiative as one provider of WorkKeys assessments and job profiles. Currently, the technical colleges charge a proctoring fee for taking the WorkKeys assessment as they do for many other on-line testing/certifications. This fee goes to support the operations of the testing center operations to include proctoring and computer maintenance.

The colleges understand that SCDEW potentially will cover the costs of the WorkKeys assessments. Fees beyond the costs of the WorkKeys assessment will be determined by each individual college as a partner in the CWRC county initiative.
