

re: movements to destroy our  
Southern Heritage

To whom this may concern:

There has been, and remains, a despicable movement among the corrupt, demonic individuals who promote revisionist history in order to slander, distort and destroy any semblance of Southern History. These liars, cowards, would-be scalawags, carpet baggers and other undesirables permeated the political arena with the specific intent to destroy all that is true historically and socially.

Those who are mere spectators or those who practice the "sin of silence" become complicit and therefore share in the same shameful criminal activity.

Anyone who desecrates monuments, graves or resting places of our honored heroes are the lowest forms of protoplasm and should be charged and punished accordingly.

Deo Vindice
