School reports draw criticism

Data shows students improving, schools sliding

By Ron Barnett

Staff writer
rbarnett@greenvilleonline.com

It can happen only in a universe in which you can move forward and backward at the same time. Or in the quantum mechanics of educational accountability.

South Carolina public school students are improving their grades in most subjects, while the majority of their schools are sliding downhill toward a big red F, according to apparently conflicting reports released by the state Department of Education on Thursday.

The percentage of students achieving proficiency in at least two subjects on the Palmetto Assessment of State Standards was up in every grade level. But nearly twice as many schools did worse than did better on the federal A-F scale, the figures show.

The apparent discrepancy, based largely on the fact that the federal accountability system raises the bar every year for schools and uses different formulas to crunch the same data, drew widespread criticism from educators across the state.

Greenville and Pickens school districts maintained their B grade on the new report. Anderson I slipped from A to B, while Jane Harrison, assistant superintendent for curriculum and instruction, said fails to account for new subgroups of students.

"We don't feel it is (accurate) because it's not showing our growth," she told GreenvilleOnline.com.

Jason McCreary, director of accountability and quality assurance for Greenville County Schools, said the district plans to appeal and will ask for some of the high school data to be recalculated.

Ten Greenville County schools — including six high schools — made an F.

Most Greenville schools — 75 — made an A or B, but 55 schools fell by at least one letter grade from last year, with 28 improving and six staying the same, according to an analysis of the figures.

Statewide, 44 elementary schools, 24 middle schools and 15 high schools dropped by two letter grades, with 14 elementary and six middle schools falling from A to F. Four elementary schools jumped from F to A.

Meanwhile, nearly half of the state's school districts — 39 — fell a letter grade, and the state's grade dropped from an A to a B despite improvements

GOP FIREPOWER

TO AID HALEY

By Rudolph Bell | Staff writer | rbell@greenvilleonline.com

Greenville continues to make the A list of places where Republicans running, or thinking of running, for national office come for fundraisers — and to test the waters.

In 2012, both the Republican candidates for president and vice president, Mitt Romney and Paul Ryan, had fundraisers in Greenville.

Earlier this year, two potential Republican presidential candidates, Rand Paul and Newt Gingrich, started statewide tours in Greenville, and Paul helped the state GOP raise money while in town.

Now three nationally known Republican governors — and potential presidential candidates in 2016 — are due in Greenville later this month to help raise money for Gov. Nikki Haley.

Govs. Rick Perry of Texas, Bobby Jindal of Louisiana and Scott Walker of Wisconsin are scheduled to attend the fundraiser at the home of Greenville developer Bob Hughes on Aug. 26, according to an invitation.

They're coming the same day that Paul, a senator from Kentucky, is scheduled to appear at U.S. Rep. Jeff Duncan's annual Faith and Freedom barbecue and fundraiser in Anderson.

A member of Haley's finance team, Spartanburg businessman Barry Wynn, said the visits have more to do with Haley's stature in the party than South Carolina's pivotal first-in-the-

While there's "always some jostling going on," it's a little early for presidential primary politics, said Wynn, a former chairman of the state GOP.

Brent Nelsen, a political science professor at Furman University, said the governors' interest in helping Haley in Greenville is "absolutely" related to South Carolina's prominent role in presidential politics.

GOP White House hopefuls "know they have to come to South Carolina, and they sure better be friendly with the governor because she could still very well be the governor in 2016," said Nel-

Gamecocks open practice with high hopes

By JOSH KENDALL
jkendall@thestate.com

South Carolina opens the 2013 season, its 120th of intercollegiate football, at 7:15 Friday night with the first practice of the fall. The Gamecocks, who were ranked No. 7 Thursday in the pre-season USA Today Coaches Poll, finished the 2012 season 11-2 with losses only to No. 9 LSU and No. 3 Florida.

South Carolina has 29 practices scheduled between today and the Aug. 29 season opener against North Carolina in Williams-Brice Stadium. The first

week of practices is expected to be open to the public at the team's Bluff Road practice facility. Here are the five things we'll be watching while we're there:

THE CLOWNEY CIRCUS

Junior defensive end Jadeveon Clowney begins what he has said will be his final season at South Carolina. He has 21 career sacks, eight away from the school record, and is a contender for the Heisman Trophy.

THE QUARTERBACK COMPETITION

Senior Connor Shaw is the starter. Junior Dylan Thomp-

son will play, and the question is how much. The question probably will be asked every time Steve Spurrier holds a press conference this month.

MAN IN THE MIDDLE

The Gamecocks have four starters returning on the offensive line with a combined 57 starts. The lone newcomer will be the most watched of the fall. That's freshman center Cody Wal-

drop, who replaces four-year starter T.J. Johnson.

LINEBACKER WHO?

Four linebackers, including Nos. 1 and 3 tacklers Shaq Wilson and Reginald Bowens, are

gone, leaving plenty of opportunity in the middle of South Carolina's defense. Middle linebacker Kaiwan Lewis and weakside linebacker Cedrick Cooper are the players to watch.

FOR KICKS

The Gamecocks haven't kicked many field goals the past two seasons, but there have been some important ones. Either Landen Ard or Nick St. Germain will hold the job this year after the departure of Adam Yates.

Man arrested after he allegedly got involved to aid teen gang members

By NOELLE PHILLIPS
nophilips@thestate.com

An argument between middle school-age gang members is what led to last week's shooting death of a man in an apartment complex parking lot, with his 3-year-old daughter nearby, Sheriff Leon Lott said.

While the dispute started between teens, it ended with adults who were watching and others who had been called for backup for the teens.

Lott said the July 24 epi-

sode is just one more sign that gang activity in the county has increased throughout the summer. And he said Thursday that original reports portraying the 25-year-old shooting victim as an innocent bystander who was holding his daughter are misleading.

Kevin J. Lewis, 29, is being held on a murder charge at Alvin S. Glenn Detention Center for the shooting death of Howard

for the teens.

Service helps track sex offenders

BY TEDDY KULMALA
tkulmala@aikenstandard.com

It's likely many would want to know if a convicted sex offender moved into their neighborhood or near their child's school, but checking lists and websites on a daily or weekly basis can be a hassle. A service provided by the Aiken County Sheriff's Office not only keeps track of registered sex offenders in the county, but sends out notifications if an offender moves within a certain distance of an address.

OffenderWatch has been used by Aiken County for six years, and is used by all 46 counties in South Carolina as well as dozens of other states, according to Sgt. Jason Feenster, a spokesman for the Sheriff's Office.

South Carolina maintains a state sex offender registry that can be searched using an offender's name or by city, but OffenderWatch al-

lows a user to input an address... and the program will notify them by email if an offender moves within a certain distance of an address.

lows a user to input an address, whether it's their home, school, gym or place of work, according to Feenster. Users can enter as many addresses as they want, and the

program will notify them by email if an offender moves within a certain distance of an address.

The program allows a user to select a search radius of between

School test results may confuse parents, public

BY ROB NOVIT
rnovit@aikenstandard.com

A revamped state standardized test – created with the blessing of the U.S. Department of Education – is likely to create confusion about the results, Aiken School District administrators said.

Mick Zais, the state superintendent of education, expressed the need for accountability testing, but acknowledged that ever-increasing performance goals mandated at the federal level are contributing to declining results in some test areas.

District officials continue to have concerns that parents and the public will have difficulty understanding the grades and the criteria that produced them, as in past years.

The school district received a grade of "C" overall, which means the district met state goals. The grades of schools had mixed results. Elementary schools with A grades are Hammond Hill, Millbrook, North Augusta, Belvedere, and Warrenton. New Ellenton and Scotland middle schools also received A grades.

Dr. Randy Stowe,
district director of administration

Silver Bluff and Midland Valley had the top high school grades with B+. Dr. Randy Stowe, the district's director of administration, expressed doubt about scores given to Chukker Creek Elementary School (B), Aiken Elementary School (C) and Aiken High, South Aiken High and North Augusta High (all C+). Several other schools fell below C grades.

The scores are not consistent, said Stowe. The lower scores for some schools are not an indication of those schools' quality of instruction.

Reaction to the local district scores | 2A

*no grade given for school

These results were released by the State Department of Education. The lower scores for some schools are not an indication of those schools' quality of instruction, said Dr. Randy Stowe, the district's director of administration.

PASS - Palmetto Assessment of State Standards. High school grades are based on performance on the High School Assessment Program (HSAP), end-of-course tests in selected subjects and graduation rates.

The PASS tests in English, math and writing have a laudable intent, Stowe said, in focusing on a school's capability to reduce the achievement gap in "sub-groups," such as black students, low-income students, English as Second Language students and those with special needs. The Aiken District is committed to improving the performance of students in those groups, Stowe said.

The requirement comes from the U.S. Department of Education. The federal agency did grant the State Department a waiver to measure its

"The ESEA waiver is not a rating of the overall achievement level of a school," Stowe said via email. "The rating indicates whether students in each sub-category are meeting the state standards or at least making progress toward those goals."

Some schools that are doing well could receive a low waiver rating, if a small group of students are not achieving. Schools with more diverse populations tend to have lower scores than those with a more homogeneous population, Stowe said. The diverse schools have more subgroups that can affect their grade.

In some situations, some schools might make a "D" or "F" yet have the same test performance as schools with much higher grades.

S.C.: High goals led to grade drop

BY JEFFREY COLLINS
Associated Press

COLUMBIA — Letter grades for nearly half of South Carolina's school districts dropped during the past school year, but education officials blame more ambitious performance goals rather than poorer student achievement.

The state Education Department released the report card data on Thursday. They show that 39 of the state's 85 districts went down at least a letter grade this school year. Just eight districts improved by at least a letter grade.

Education officials said they set higher and more ambitious goals for the 2012-13 school year compared with the year before, and other data released on Thursday shows the performance of South Carolina students improving.

Officials said 82 percent of South Carolina high school students passed the graduation exam on the first try. It is the fourth straight year of improvement and the highest rate in a decade. The percentage of students who scored the highest level on the exam also improved this past school year from 25 percent to 32 percent.

The Education Department also released test scores for other standardized tests given to third-through eighth-graders. Nearly all grades continued to show improvement in English and language arts scores, while math results were more mixed.

The report cards are part of the accountability efforts under the federal No Child Left Behind act. Failing grades require schools to provide tutors and allow children to transfer to schools with better grades.

Some parents, schools and administrator groups complained that the report cards depend too heavily on standardized tests and the formula is poorly designed.

They also pointed out how volatile the rankings are. Twenty-one of the state's nearly 1,100 schools went from an A to an F in one year.

"Instead of supporting student and school progress, the state department is sadly maintaining the test, label and then punish approach which is known not to work with No

SOGGY JULY

Upstate breaks record for rain

By JENNY ARNOLD
jennifer.arnold@shj.com

As storm clouds gathered Thursday, S.C. Department of Transportation workers set out barricades on a small portion of Vanderbilt Road.

A box culvert, which resembles a small bridge, is sinking near Vanderbilt Lane, and that portion of the road can't be used until DOT workers shore up the earth around the culvert and repave it.

It should come as no surprise that heavy rain weakened the ground around the culvert, causing it to sink.

According to the National Weather Service, 14.45 inches of rain fell in July at Greenville-Spartanburg International Airport. The normal rainfall is 4.8 inches for the month, said Jeffrey Taylor, a meteorologist with the National Weather Service in Greer.

Spartanburg was not alone as

the rain kept falling. In Anderson County, 15.39 inches of rain fell last month. Besides the airport in Greer, another site in Spartanburg recorded 10.33 inches of rain, and the Florence airport had 14.91 inches, all records for July, according to the Southeast Regional Climate Center.

June was also a rainy month, with a total of 9.43 inches of rain recorded at the airport in Greer, about 1.5 inches below the record set in 1886. In fact, it has been a banner year for precipitation. Greenville-Spartanburg International Airport has recorded 47.08 inches of rain so far in 2013. The normal level would be 28.18 inches by this time.

Although residents may beg to differ, it wasn't rainy everywhere in South Carolina during July. The airport in North Charleston

RAISING AWARENESS, MONEY

Local school districts get good grades

By LYNNE P. SHACKLEFORD
lynne.shackleford@shj.com

Spartanburg school districts fared well on letter grades released Thursday by the state Department of Education.

Statewide, 77 percent of school districts and 76 percent of schools met the state's expectation of a C rating or better on the federal accountability system. This is the second year schools and districts have received the letter grades that correlate to a composite score based on state standardized tests, such as PASS, HSAP, SC-Alt and end-of-course tests, the percentage of students tested and high school graduation rates.

The letter grades replaced Adequate Yearly Progress (AYP), and are part of the state's request to modify its reporting under certain provisions of the Elementary and Secondary Education Act (ESEA), or No Child Left Behind.

Spartanburg school districts 2 and 4 received two of the three highest grades in the state. District 2 received an overall total of 92.8 points or an A rating, just slightly higher than the 91.7 points it received last year. District 4 received 92.7 points, also an A rating, which was slightly higher than the 90.8 points it received last year.

Districts 1 and 5 also earned A ratings with 90.9 points and 90.6 points, respectively. Districts 3 and 6 earned B ratings

ELEMENTARY & SECONDARY EDUCATION ACT FEDERAL ACCOUNTABILITY SYSTEM

SLIDING SCALE

Ninety Six district posts 4th-best score; D50 plummets

INDEX-JOURNAL FILE

A Greenwood High School teacher instructs her class in August 2012. Greenwood High scored a 77.6 (down from an 83.3) in the recently released Elementary and Secondary Education Act (ESEA) Federal Accountability System grades. As a district, Greenwood District 50 registered a 64.8 for a D.

By SCOTT J. BRYAN
sbryan@indexjournal.com

One Lakelands school district reached an impressive high, while another reached a disappointing low with the release Thursday of a report documenting student achievement and improvement.

The S.C. Department of Education issued the Elementary and Secondary Education Act (ESEA) Federal Accountability System report, which grades schools and districts with numerical and letter grades.

The top performer in the Lakelands was Ninety Six school district, which registered a 91.8 (A), the fourth-best grade in South Carolina.

"Certainly, we're ecstatic," Ninety Six superintendent Mark Petersen said. "I wish I could take the credit, but I think the credit goes to the students, staff, mommies and daddies, and the community at large."

"They have been very supportive of the district for many years. This really just vali-

dates the efforts our folks are putting forth."

In last year's first year of the grading system, which replaced Adequate Yearly Progress (AYP), Ninety Six scored an 88. This year, individual school grades for Ninety Six

included Ninety Six Elementary (95.3), Ninety Six Primary (97.3), Edgewood Middle (90.1) and Ninety Six High (87.4). All schools improved from a year ago, with the exception of Ninety Six Primary, which did not have a score.

"We thought (the scores) were going to be very good," Petersen said. "With Common Core coming on, we have some questions we'll have to look at and adjust. But I'm extremely proud."

At Greenwood District 50 — the largest district in the Lakelands — the grades were significantly more distressing. As a district, it registered a 64.8 (D), dropping from 2012's 85.8. Of 80 districts in the state, Greenwood's mark placed it 66th.

The 2013 ESEA grades awarded Greenwood 50 schools were surprising and

Test scores released

Earlier grades fare better; Sumter students still below state averages

BY BRANDEN BUNCH
bbunch@theitem.com

Sumter students and their schools tend to perform better in the earlier grade levels, a series of reports released by the South Carolina Department of Education indicate.

On Thursday, the state department released a wide array of scores and results for students and schools from the 2012-13 school year, including testing results from both the High School Assessment Program (HSAP) and Palmetto Assessment of State Standards (PASS), as well

as school and district ratings based on the Elementary and Secondary Education Act, which typically is referenced as No Child Left Behind (NCLB).

Within the reports, a pattern of declining improvement throughout the grade levels emerges. In addition, in Thursday's reports, Sumter students continued to perform below state averages.

School grades drop across Pee Dee, SC

No A's, more F's in year 2 of federal accountability model

BY ELLEN MEDER
Morning News
emeder@florenconews.com

Pee Dee schools and districts followed a statewide trend of declining federal accountability grades, according to data released by the S.C. Department of Education on Thursday.

Of 12 districts in the region half

fell at least a letter grade, and only Florence School District 2 increased a letter grade, one of only eight districts out of 85 in the state to do so.

The region's largest districts maintained the highest marks for the sec-

ond year in a row, despite a fall from A: Darlington had the highest with an 88.7, a B, and Florence School District 1 came in second with 86.1, a B. Florence 2 and Chesterfield County joined them with Bs.

"While I'm pleased with our efforts overall, I believe we still have a great deal of work to do," said Dr.

State blames higher goals for dip

The Associated Press

COLUMBIA — Letter grades for nearly half of South Carolina's school districts dropped during the past school year, but education officials blame more ambitious performance goals rather than poorer student achievement.

The state Education Department released the report card data Thursday. They show that 39 of the state's 85 districts went down at least a letter grade this school year. Just eight districts improved by at least a letter grade.

Education officials said

Wet July's rainfall a record for Florence

BY GAVIN JACKSON
Morning News
gjackson@florenconews.com

FLORENCE — Florence and several locations statewide saw the wettest July on record, according to state climatology officials.

The Florence Regional Airport, where official meteorological measurements are taken, received 14.91 inches of rain in July, the highest for the location since readings were taken in 1948. July 2013 is second to July 1916, when 18.05 inches of rain fell in downtown Florence because of Bull's Bay Hurricane, making for the wettest month in Florence history.

South Carolina Department of Natural Resources climatologist Wes Tyler, who oversees state records, said July 2013 still makes for a record.

"Prior to 1948 they were making observations in the city, downtown and the record for downtown Florence, which is for all months was in July 1916," Tyler said. "But that was in downtown Florence, the new record was at the airport."

In July there was measurable rainfall for 15 of the 31 days helping unseat the prior record of 13.68 inches in July 1959.

Rainfall for the first six months of 2013 totaled 42.02 inches, passing the 2012 total rainfall of 41.62 inches and putting the city on track for the wettest year ever, a record set in 1959 with a total of 64.71 inches of rain. Average annual rainfall for Florence is 43.28 inches.

The Times and Democrat

Gunshot killed man found in lake

T&D Staff Report

A day of awaiting answers on the death of a Holly Hill man produced news of a key finding but left open a major question.

Orangeburg County Coroner Samuelle Marshall informed The Times and Democrat by email at 8:38 p.m. Thursday that an autopsy concluded that 57-year-old Richard "Rick" Cummings Jr. died from a gunshot wound to the head.

"The manner is pending investigation," she said.

The coroner could not be reached for further comment as to whether foul play is suspected.

Cummings' body was pulled from Lake Marion at about 9 a.m. Wednesday, according to S.C. Department of Natural Resources Region 3 Capt. Robert McCullough. The man had been missing since Monday.

According to an Orangeburg County Sheriff's Office incident report, deputies Monday night met with a childhood friend of Cummings, who said he last saw Cummings Sun-

day at his father's residence at Cypress Shores Marina. He said Cummings had taken a swim earlier that day, then returned to his home.

Cummings' wife, Cynthia, said her spouse left for work at 7 a.m. Monday and reported to his workplace, the report stated. When she called to check in with her husband later in the day, an employee told her Cummings had left for a job site about 8:30 a.m., according to the

SPECIAL TO THE T&D

A distracted driver smashed her car through Whitman Mold on U.S. 301 South about 7:30 p.m. Wednesday. No one was injured. The driver, a 19-year-old Orangeburg woman, was charged with driving too fast for conditions. More photos at TheTandD.com

TOP-HEAVY ADMINISTRATION?

CHRISTOPHER HUFF/T&D

South Carolina State University President Thomas Elzey discusses with the board of trustees on Thursday action to be taken in the wake of the school's warning from the accrediting organization SACS. Elzey says the school will prove itself in coming months (Story, A3). See related video at TheTandD.com

S.C. State trustees question Elzey on reorganization moves, plans

By DALE LINDER ALTMAN
T&D Staff Writer

After seven weeks at the helm, President Thomas Elzey on Thursday faced trustee scrutiny of this ongoing reorganization of the South Carolina State University administration.

Elzey presented trustees with proposed organizational changes that would create three new vice presidential slots as well as new positions for a provost, an associate provost and an associate provost for sponsored programs.

Trustee Robert Nance questioned if the new positions could be created without approval by the board.

"My other point of concern is ... I thought we spent the last two to three years trying to

do away with a top-heavy administration," he said. "This plan seems to be bringing a heavy administration back."

Elzey said he doesn't feel the proposed changes will create a top-heavy administration. The management and operations of the university in certain areas have been sorely neglected over the past few years and the new administrators are needed, he said.

"We don't even have an annual campaign to raise money for this university," Elzey said. "We don't have an enrollment strategy for bringing the number of students back up."

Additionally, there hasn't been a capital improvement plan since about 2000, he said.

Elzey said his proposed reorganization is an attempt to find people with the right skill sets

to address those critical areas and move the university forward.

"If we want to bring the hustler back to the university, we have to have the people to do it," Elzey said.

Nance asked if funds are available to pay for the positions.

Elzey said that two vice presidents and another individual are no longer at the university, which will provide funding for the new positions.

Elzey introduced new employee Sonya Bennett, who will fill the newly created position of vice president for external affairs and

'IT WAS WILD'

Distracted driver's car crashes into 301 industry

By RICHARD WALKER
T&D Staff Writer

Nights are typically quiet for workers at Whitman Mold on U.S. 301 South of Orangeburg.

Wednesday night, however, was anything but typical.

Employee Travis Player said his shift became quite interesting when he heard a "really loud boom."

"I turned around and I saw a door flying through the air," Player said. "And I saw the front of the car looking right at me."

Player was just feet away from a wall that exploded at about 7:30 p.m. after a car left 301 and crashed through Whitman Mold.

"It was wild," Player said. "I didn't expect to see a car coming through here."

The next car to pull up was a cruiser belonging to the S.C. Highway Patrol.

Lance Cpl. Judd Jones said a 19-year-old Orangeburg driver was charged with driving too fast for conditions after she tried to make a turn. Jones said the woman had dropped something in the floorboard and was reaching for it while at the same time trying to turn onto Dempsey Road.

That turn morphed into more of an arc, sending the Toyota through the side of Whitman Mold.

Neither the driver nor the passenger in the vehicle was injured.

Player said once the doors stopped flying around inside the building, he helped the two teens get out of the car.

"I was on the phone with 911 at the same time," he said.

It was a little warmer inside the facility Thursday. The only thing standing guard between the car and the outer wall was an air-
