At The Bond Buyer's National Outlook 2019 Conference , experts will offer thoughts on the Fed and bond issuance, and will parse the future of fiscal policy and the continuing implications of the Tax Reform as approved.

Limits on SALT and the lower Corporate Income tax are having implications for the selling and pricing of bonds. Is there any momentum remaining for more infrastructure investing? Will new tools become available?

The agenda is shaping up, and we're pleased to share with you the preliminary topics that will be broached at this year's conference.

(but aren't limited to!)

This timely conference will assess the record for 2018 and will look ahead to the challenges and opportunities awaiting the U.S. municipal market in 2019.

Join us for a thought-provoking discussion, and a full slate of unrivaled networking opportunities for which The Bond Buyer Conferences are known.
