Happy Fall Y'all! Today is the Autumnal Equinox, or the first day of fall. Today the hours of daylight should equal the hours of darkness, and from here on out, the days or daylight will be shorter than the night. So happy Autumnal Equinox to you all and bring on those cooler temps and lovely leaves! ;)

Chuck Baumbach Were is this place, it is beautiful?

John Jordan Actually the days start getting shorter at the summer solstice and continue to get shorter until the winter solstice.
