Subject: Header Problem

---

OK, v06 of the book is out there. Go to Section 73/ORS (budget section...not header section). Note that starting here and for a number of sections thereafter...the header doesn't perfectly correspond to the way it's set up going back to the Department of Education.

I want these to line up perfectly throughout the book, because the text, headings, and tables in the main body of the book are all designed to line up with the header and footer. I'm having problems setting the width of the goals and objectives columns (which I've pulled out now) because the width and placement of the headers throughout the book isn't uniform.

Anyway, you wanna take a look at it? I fixed everything leading up to this section, but I can't take it anymore. Thanks.
