Also, do you know what the employer contribution translates into on a PMPM or other comparable basis? Thanks.

Christian,

See attached for the 3 year budget projection we provided for the Budget Office in November of 2012. This should give you some idea of the projected trend for the 2015 plan year. We have also asked the actuarial consultants if they have any updates on the projected trend for that plan year. I'll let you know if we hear something.
