S, K, and T- The CON meeting yesterday was out of context for a lot of people. Board members, lobbyists, and legislators have been working on the current reform bill for 2 years with the understanding that they had the Governor's support. Mainly because I told them they did - because she said I could. I'm also unclear why you have that meeting without the agency head who administers CON and has run point for the Governor's office on the matter. I don't need a response, but you undercut my credibility yesterday and it was pointless.
