To: Medicare,

yes I do need help, I don't know who I legitimately owe money to & who I don't. I have not refused to pay any "cost" I do not only suspended them until they are proven "just". I do not want to help any doctor make a "bad payment" or to fill in a pay check for their own profit. I will start by going to Dr. H. Kessner of the Sanford Memorial Physicians Primary care for an exam of a lump in my left pelvic area. He diagnosed it as a possible hernia. I was examined by nurse & it was "real" by someone else. I was notified by phone that nothing was wrong. Well I have recently had a hernia op. in the very same area. Also on another hospital visit I came home with a post op on each check of my buttocks which was witnessed by Dr. Kessner. On another hospital visit I was sent home with an oxygen concentrator & breathing harness which I did not use. On two post hospital visits with Dr. Kessner my oxygen readings were 95 or greater & the Dr. said I did not need to be on oxygen. So was Medicare & myself going to be charged with unnecessary diagnosis & materials? I think not. Also two other doctors submitted bills to Medicare & me for services not rendered & I have a letter from Medicare to prove this. I have had too many visits to the VA in Charleston & here in Trenton. I blame most of this on a trust caused by greedy adults & age children & the wrongful procedure of the Fort Royal Police supervisors & the Probate Court of Beaufort Co. S.C. This has been going on for over three years & no one will investigate it.

②

All state levels of judiciary responsibility are involved  
are they afraid of the truth? I think so. No guts.  
Anyway due to my wife + I being of advanced ages  
I believe the "authorities" are just waiting for me  
to die to "shut me up". There are bank records, phone  
records + plenty of other documentation to prove all  
of the wrongdoing including "my" so called lying  
attorneys. Please Help!!!
