

Preventive worksite screening

Employees like you are our most valuable asset. That makes your health and well-being very important to us. We want to help you get healthy and stay healthy.

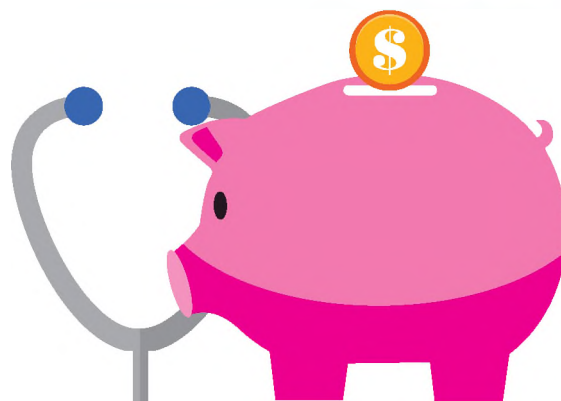

You're invited to a free preventive worksite screening worth more than \$300. The screening includes a blood pressure check, health risk assessment, lipid panels and more. You can share your confidential results with your doctor to eliminate the need for retesting. Identifying health issues early can really save you money.

So register today.

Employees, retirees, COBRA subscribers and covered spouses whose primary coverage is the State Health Plan can take advantage of this screening.

PEBA is helping you — and your family — get and stay healthy. We are doing this by offering several free benefits.

Learn more about other PEBA Perks at www.PEBAperks.com.
