Subject: MOX Fuel Post in Forbes

Hi folks,

I just posted that completing the MOX Fuel Fabrication Facility near Aiken, S.C. is the only way to destroy the 150,000 lbs of surplus weapons-grade plutonium in the U.S. and Russia that makes it unusable for nuclear weapons, and it makes a lot of cheap energy to boot! Using sequestration and budget wrangling to kill this is stupid beyond imagination.

<http://www.forbes.com/sites/jamesconca/2013/04/23/destroying-nuclear-weapons-takes-a-little-moxie/>

Regards,

Jim
